1. **Programme Title(s):**

MA International Education  
Postgraduate Diploma/Postgraduate Certificate International Education*

*Exit awards only

2. **Awarding body or institution:**

University of Leicester

3. a) **Mode of study**

Full Time

b) **Type of study**

Campus based

4. **Registration periods:**

The normal period of registration is 1 year  
The maximum period of registration is 2 years

5. **Typical entry requirements:**

Entry requirements are:

- 1st degree at a good class 2.2. (UK equivalent) or above  
- GPA 3 (US equivalent) or above

Students whose first language is not English or who have not lived in a country where the first language is English for at least three years immediately prior to starting the programme must possess an appropriate English language qualification.

Acceptable evidence includes: GCSE/O-Level English language at grade C or above; an overall score of 6.5 in the British Council IELTS test with a minimum score of 6.0 in each component; a TOEFL score of 600 (paper) or 90 (IBT).

In addition, students should have demonstrable evidence of engaging with education in school or college, either through practical experience as teachers and/or as a substantial element of their degree.

6. **Accreditation of Prior Learning:**

N/A

7. **Programme aims:**

The programme aims to

- To enhance understanding of contemporary educational issues, both national and international, for educational professionals across all phases of education. To develop participants’ ability to reflect on theory in the area of teaching and learning and use it as the basis for understanding and improving practice.
• To develop participants’ ability to undertake small scale research.
• To develop participant’s understanding of ethical principles which underpin the design, conduct and reporting of educational research.

Students will be enabled to:
• Develop an understanding of pedagogical theories.
• Appreciate the relationship between theory and practice in education.
• Understand the influences of societal or national / regional / religious culture on teaching.
• Evaluate the use and management of learning resources, including ICT, for learners within their phase of education.
• Understand the various elements of the planning, monitoring and evaluation cycle as applied to education.
• Understand how to carry out and present small-scale research on the topic of effective education, teaching and learning.

By the end of each module, students will be able to:
• Select a topic within the area covered by the module and justify their choice in relation to their current or planned professional practice.
• Produce a coherent literature review of the topic which identifies and critically comments on appropriate theoretical, research and practice-based literature.
• Draw conclusions from literature reviews and apply findings to a consideration of teaching, learning or assessment or management of these processes, if and where appropriate.
• Have an understanding of the guiding principles of designing, conducting and disseminating ethical research in educational contexts.

In addition to the above generic Module objectives, students will be required – through the Core Introduction to Research Methods Module and the Dissertation - to design, pilot and conduct a small-scale research study in an area relevant to their current or planned professional practice and demonstrate an ability to critically evaluate research data and to apply findings to a consideration of teaching, learning, assessment or management.

| informed by ethical principles, and how such research would inform their own professional contexts. | Course materials including:  
- Directed tasks  
- Directed reading  
- Study-skills development materials  
- Podcast lecture  
Tutor support via:  
- One-to-one tutorials  
- Small-group tutorials/seminars | Showing use of these techniques in:  
- Poster  
- Portfolio tasks |
| Techniques | Working alongside educational practitioners and those with experience of educational contexts from a wide range of cultural and professional backgrounds. | Student evaluation of the course.  
Students' reflections on their own personal and professional development. |
| Develop communicative and intercultural competence. | Engagement with educators/practitioners in UK context through (e.g.)PGCE programme, visiting experts, school visits |  |
| Develop the ability to apply the skills and knowledge gained to their own professional contexts. | Classes and seminars involving critical debate based on pre-class reading.  
Individual and group tutorials analysing aspects of educational theory, policy and practice  
Online discussion with personal tutor regarding essay/dissertation drafts and other formative activities. | Development of critical argument through extended essays, presentations, portfolio, poster and final dissertation. |
| Display ability to analyse and critique relevant arguments, debates and points of view in areas of Educational theory, policy and practice. | Classes and seminars involving critical debate based on pre-class reading.  
Individual and group tutorials analysing aspects of educational theory, policy and practice  
Online discussion with personal tutor regarding essay/dissertation drafts and other formative activities. | Development of critical argument through extended essays, presentations, portfolio, poster and final dissertation. |
| Demonstrate understanding of developments in Educational systems in international contexts. | Classes and seminars involving critical debate based on pre-class reading.  
Individual and group tutorials analysing aspects of educational theory, policy and practice  
Online discussion with personal tutor regarding essay/dissertation drafts and other formative activities. | Development of critical argument through extended essays, presentations, portfolio, poster and final dissertation. |
| Critically evaluate the relationship between Educational theory and Educational practice. | Classes and seminars involving critical debate based on pre-class reading.  
Individual and group tutorials analysing aspects of educational theory, policy and practice  
Online discussion with personal tutor regarding essay/dissertation drafts and other formative activities. | Development of critical argument through extended essays, presentations, portfolio, poster and final dissertation. |
| Critically examine the ethical principles which underpin both existing research and how this informs the design, and conduct of their own empirical studies. | Classes and seminars involving critical debate based on pre-class reading.  
Individual and group tutorials analysing aspects of educational theory, policy and practice  
Online discussion with personal tutor regarding essay/dissertation drafts and other formative activities. | Development of critical argument through extended essays, presentations, portfolio, poster and final dissertation. |
| Critical analysis |  |  |
| Presentation | Study guides and induction to support development of academic literacy.  
Study-skills sessions  
Tutorials | Good organisation and presentation are specific aspects of our formal marking criteria in all assignments, including use of tables and graphs etc. In terms of assessment, these are demonstrated through essays and also through assessed oral presentations to show mastery of presentational skills and an assessed presentation of a conference –style poster to demonstrate ability to display concepts and outcomes clearly and concisely for a public audience |  |

| The programme is designed to progressively develop in students the ability to interrogate contemporary issues in Education as increasingly autonomous and skilled researchers. This is achieved through the Module structure as follows: | A mixture of:  
- Tutor-led classes  
- Student-led seminars  
- Collaborative tasks  
- Directed tasks  
- Study-skills sessions  
- Student presentations  
- Tutorials  
- Directed reading  
- Dissertation supervision  
- Blackboard (VLE) support site | Extended essays  
Presentations  
Portfolio  
Poster  
Online discussion ‘threads’  
Formal dissertation plan  
Final dissertation. |

In **Core Module 1**, students develop an understanding of key theories and concepts in international Education studies developed in tutor-led sessions.

In **Core Module 2** students develop knowledge, skills and understanding of how to design and conduct robust, trustworthy and ethical educational research, further supported through additional Study Skills sessions which focus on practical experience of research techniques.

Specialist Pathways provide the opportunity for students to develop in-depth knowledge and understanding of a chosen aspect of Education (**Modules 3 & 4**).

Module 4 focuses on dissertation preparation through a mixture of tutor-led classes, student-led seminars, online discussion-groups and individual tutorials.

### (b) Transferable skills

#### Research skills

Students should have a clear idea of the practicalities of carrying out trustworthy research e.g.:  
- Developing researchable questions  
- Constructing a realistic and robust research design which exemplifies appropriate consideration of paradigm, methodology, data collection methods and analytic procedures  
- Planning a timetable for fieldwork; working out the feasibility of an intended study in particular contexts  
- Gaining access to the field  
- Keeping a research diary  
- Gaining access to a site for research  
- Carrying out research ethically

Course materials including:  
- Directed tasks  
- Directed reading  
- Study-skills development materials  
- Podcast lectures

Tutor support via:  
- One-to-one tutorials  
- Small-group tutorials/seminars

- Oral presentations  
- Portfolio  
- Poster

10. Special features:
- In 2009, the new MAIE programme was designed to combine three existing Masters programmes as pathway options while at the same time introducing a new international perspective as described above.

- The programme is designed to explore contemporary issues in education in an international/intercultural context. This moves away from the previous model in which such perspectives were mainly derived from students sharing knowledge and experiences in response to discussion focusing on largely UK-specific policy and practice, to one in which international/intercultural perspectives are embedded into programme content and assessment.

- Specialist pathways enable students to explore in depth areas of specific interest. The leadership and management pathway has been re-written to focus attention onto leadership for social justice in education. The pedagogy pathway remains the same, as does the educational innovation and reform pathway, which incorporates a range of emerging issues in education including globalization, sustainable development, citizenship education and alternative schooling. The new and updated pathway modules have all been given official approval.

- Each pathway consists of a lead module and a specialist study module. The specialist study module is focused on dissertation preparation and is designed to develop in the student skills and abilities of an autonomous educational researcher in an area of their choosing, through a combination of intensive tutorial support, student-led small group seminars and supported self-study.

11. Indications of programme quality:
- As noted above, the new programme was originally built upon the course content of the former programmes. The existing programmes shared various aspects of core Modules and hence assessment procedures and standards. Examiners’ reports for all three of these programmes have been consistently positive, and their recommendations are fully discussed and followed up appropriately, with annual reports to the Vice-Chancellor of the action taken. Student feedback (through formal module and course evaluation surveys and staff-student councils) have similarly been consistently positive for all three programmes. Again student comments are followed up and revisions to course content, structure and support have been made where appropriate.

12. Scheme of Assessment
As defined in Senate Regulation 6: Regulations governing taught postgraduate programmes of study.

13. Progression points
As defined in Senate Regulation 6: Regulations governing taught postgraduate programmes of study.
In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course and a recommendation will be made to the Board of Examiners for an intermediate award where appropriate.

14. **Rules relating to re-sits or re-submissions:**
As defined in *Senate Regulation 6*: Regulations governing taught postgraduate programmes of study.

15. **Additional information** [e.g. timetable for admissions]
There is a single intake per year in October. Application is recommended at least four weeks before the programme is due to start, and preferably earlier. For example, to start the programme in October, please aim to submit your application by the end of August.

16. **External Examiners:**
The details of the External Examiner(s) for this programme and the most recent External Examiners’ reports can be found [here](#).
Appendix 1: Programme structure (programme regulations)

M.A./Postgraduate Diploma/Postgraduate Certificate in International Education

Period of Registration: One year full-time

Entry Requirements:
- 1st degree at a good class 2.2. (UK equivalent) or above
- GPA 3 (US equivalent or above)
- Students whose first language is not English or who have not lived in a country where the first language for at least three years prior to starting the programme must possess an appropriate English Language qualification. Acceptable evidence includes: GCSE/O-Level English at grade C or above; an overall score of 6.5 in the British Council Test (from October 2010 there is a requirement that a minimum score of 6.0 is obtained in each component); a TOEFL 600 (paper) or 90 (IBT)
- In addition, students should have demonstrable evidence of engaging with education in school or college, either through practical experience as teachers and/or as a substantial element of their degree.

Curriculum: Following completion of the core modules students will be required to specialise in one of six named pathways. The modules required to complete each pathway are listed below.
