

Programme Specification (Undergraduate)

FOR ENTRY YEAR: 2022/23

Date created: 23/12/20 Last amended: 02/03/2022

Version no. 1

1. Programme title(s) and code(s):

- BA (Hons) Geography L700
- BA (Hons) Geography with a year abroad*
- BA Geography with a Year in Industry*

Notes

* An award marked with an asterisk is only available as an exit award and is not available for students to register onto.

a) [HECOS Code](#)

HECOS Code	%
100409	100%

b) UCAS Code (where required)

L700

2. Awarding body or institution:

University of Leicester

3. a) Mode of study

Full-time

b) Type of study

Campus-based

4. Registration periods:

BA (Hons) Geography (L700)

The normal period of registration is three years

The maximum period of registration five years

BA (Hons) Geography with a year abroad and BA (Hons) Geography with a Year in Industry

The normal period of registration is four years

The maximum period of registration six years

5. Typical entry requirements

ABB A level. Any three A levels usually required; Geography is not required. Two AS levels can be considered in place of one A level towards the total. General Studies accepted. BBB + EPQ at grade B, two AS-levels considered in place of one A-level. General Studies accepted. Key Skills also welcome.

For the aims, learning outcomes and application criteria for the GCSA Year Abroad please see <https://le.ac.uk/study/undergraduates/courses/abroad>

6. Accreditation of Prior Learning

APL will not be accepted for exemptions from individual modules, however it may be considered for direct entry to year 2, on a case by case and subject to the general provisions of the University APL policy.

7. Programme aims

The programme aims to

- present a contemporary view of the world drawing on the breadth of the many geographical traditions with an emphasis on Human Geography;
- place geography at the core of modern discourses about the world and the events which are taking place in it;
- provide an intellectually challenging and stimulating curriculum that draws on the research expertise of staff in the department and enables students to develop in-depth knowledge and understanding of specialised areas of human geography;
- develop students' awareness of space and the world, and formulate geographical explanations for the phenomena they encounter;
- develop students' abilities to explore varied modes of geographical theories, techniques and concepts to analyse and explain the modern world;
- develop students' abilities to use and apply appropriate field, statistical and social survey methods to analyse issues from a geographical perspective; and
- provide a learning experience in which students can develop and demonstrate a range of transferable skills necessary for effective independent learning; career and personal development.
- provide opportunities to develop employability skills, and career and personal development planning.

For the 'with a year abroad' variant only, these additional programme aims apply:

- Develop enhanced employability skills
- Experience living and learning in a different cultural environment
- Develop Global Citizenship competencies
- Build new social, academic and professional international networks

For the Year in Industry variant only, these additional programme aims apply:

- Prepare students for career and training opportunities which relates to their degree – in both the private and public sectors, and voluntary organisations.
- Construct effective applications for placement opportunities
- Provide students the opportunity to recognise suitable plans for transitioning into the workplace

8. Reference points used to inform the programme specification

- QAA Benchmarking Statement
- Framework for Higher Education Qualifications (FHEQ)
- UK Quality Code for Higher Education
- [University Learning Strategy](#)
- [University Assessment Strategy](#)
- University of Leicester Periodic Developmental Review Report
- External Examiners' reports (annual)
- United Nations Education for Sustainable Development Goals
- Student Destinations Data

9. Programme Outcomes

Unless otherwise stated, programme outcomes apply to all awards specified in 1. Programme title(s).

a) Discipline specific knowledge and competencies

i) Mastery of an appropriate body of knowledge

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate an appropriate body of geographical knowledge including patterns and processes of environmental systems and cycles, environmental change and human and environmental interactions.	Lectures, tutorials, seminars, computer-aided learning and computer-based practical, laboratory based practical, directed readings, independent research, student centered learning, presentations and discussion.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem-based exercises, field & lab notebooks, review papers, bibliographies

ii) Understanding and application of key concepts and techniques

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate knowledge of the different approaches to geographical explanation and interpretation.	Lectures, tutorials, seminars, directed reading, independent research, computer practical, group learning.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
Demonstrate a competence in the varied methods of interpreting the physical environment	Tutorials, seminars, directed reading, independent research, computer practical; laboratory based practical, group learning.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
Recognise the ways in which physical, environmental, and cultural processes lead to the distinctiveness of places.	Lectures, tutorials, seminars, directed reading, independent research, computer practicals, group learning.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.

iii) Critical analysis of key issues

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Critical evaluation of the theoretical, philosophical and methodological perspectives employed in physical geography; geography's role in interdisciplinary studies within natural and social sciences; and the role of physical geography in contemporary society.	Lectures, tutorials, seminars, directed reading, independent research, computer practicals, group learning.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
Awareness of advantages and problems of varied geographical methods of analysis.	Tutorials, seminars, directed reading, independent research, computer practicals, group learning	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
Critical reflection on research observations presented in the literature and own empirical research.	Tutorials, seminars, directed reading, independent research, computer practicals, group learning	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.

iv) Clear and concise presentation of material

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Use a variety of geographical and general methods to present information to a range of different audiences.	Tutorials, seminars, independent research, computer practicals, group learning.	Writing tasks, design, mapping and visualization tasks (e.g. posters, magazines), contributions to discussion, dissertations (presentation of independent research), presentation skills.

v) Critical appraisal of evidence with appropriate insight

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Formulate appropriate questions for geographical inquiry, and gather and utilise suitable evidence in answering them.	Tutorials, seminars, directed reading, independent research, computer practicals, group learning.	Writing tasks, design, mapping and visualization tasks, contributions to discussion, dissertations (presentation of independent research), presentation skills.
Read, analyse and reflect critically and contextually on geographical texts and other source materials.	Tutorials, seminars, directed reading, independent research, computer practicals, group learning.	Writing tasks, design, mapping and visualization tasks, contributions to discussion, dissertations (presentation of independent research), presentation skills.

vi) Other discipline specific competencies

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Conduct an independent piece of geographical research from problem formulation to evidence collection, result presentation and discussion.	Dissertations; group and independent research. Field courses, computer practicals, laboratory practicals, lectures.	Dissertations; group and independent research.
Use specialised techniques and approaches for the collection, interpretation and explanation of geographical processes and information.	Dissertations; group and independent research. Field courses, computer practicals, laboratory practicals, lectures.	Field reports, group and independent research; dissertations; tutorials; objective testing; laboratory reports.
Use specialised techniques and approaches for the presentation of geographical information.	Dissertations; group and independent research. Field courses, computer practicals, laboratory practicals, lectures.	Field reports, group and independent research; dissertations; design, mapping and visualization tasks.

b) Transferable skills

i) Oral communication

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate clear, fluent and coherent oral expressions of geographical issues.	Seminars, tutorials, field courses.	Seminar and tutorial presentations, contributions to discussions.
Participate effectively in group discussions of geographical issues.	Seminars, tutorials, field courses.	Seminar and tutorial presentations, contributions to discussions.

ii) Written communication

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Present coherent and fluent geographical arguments in a variety of written formats.	Seminars, tutorials, group working.	Essays, essay-based examinations, dissertations, practical reports.

iii) Information technology

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Use information technology in general, and geographical information systems in particular to explore and analyse geographical concepts and information.	Induction programme, computer practical classes and independent research.	Computer-based exercises. Independent research, dissertation, problem solving exercises, essays, web pages, posters, group reports.

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Use IT to effectively support geographical studies, including the use of IT for bibliographic research, and written and visual presentation of information.	Computer practical classes, group and independent research.	Computer-based exercises. Independent research, dissertation, problem solving exercises, essays, web pages, posters, group reports.

iv) Numeracy

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Use statistical and graphic techniques to explore, analyse and visualise geographical concepts.	Lectures; computer practical classes, independent research	Computer-based exercises. Independent research, dissertation.

v) Team working

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Work effectively and collaboratively in teams to collectively explore geographical concepts and tasks.	Tutorials, seminars, team problem solving, field courses.	Seminar and tutorial working, problem solving exercises.

vi) Problem solving

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Explore geographical problem spaces with contemporary discourses and approaches	Tutorials, seminars, team problem solving, field courses.	Seminar and tutorial working, problem solving exercises.

vii) Information handling

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Gather, retrieve and manipulate geographical evidence and information in support of geographical arguments	Tutorials, seminars, directed reading, independent research, computer practicals, team problem solving, field courses.	Essays, essay-based examinations, dissertations, practical reports., seminar and tutorial working, problem solving exercises, team problem solving
Analyse information from a variety of sources to develop and construct geographical arguments and interpretations.	Tutorials, seminars, directed reading, independent research, computer practicals, team problem solving, field courses.	Essays, essay-based examinations, dissertations, practical reports., seminar and tutorial working, problem solving exercises, team problem solving

viii) Skills for lifelong learning

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate intellectual development and independence through the setting of research tasks and the solving of geographical problems.	All of the above particularly, independent research and seminar presentations	All of the above, particularly, dissertations, seminars, essays, independent research.
Reflect upon own learning and use personal development planning to plan personal, academic and career development.	All of the above, particularly tutorials, Personal and Development Planning	Discussions with personal and other tutors; Curriculum vitae writing. Employability & career development module.
Manage time effectively to meet targets and deadlines.	All of the above, particularly independent research and self-directed study.	All of the above, particularly, dissertations, seminars, essays, independent research.

For Year in Industry students (only)

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated
Placement Preparation 1 and 2		
1. Select appropriate resources for researching/securing placement opportunities	Students are provided with dedicated and timetabled sessions to prepare to search and secure a year in industry. Problem solving classes, Masterclasses, Career development programmes, Independent research.	Formative module feedback through session tasks and exercises
2. Explain the process for applying for and securing a relevant placement	Students are provided with dedicated and timetabled sessions to prepare to search and secure a year in industry. Problem solving classes, Masterclasses, Career development programmes, Independent research.	Formative module feedback through session tasks and exercises
3. Construct effective applications for placement opportunities	Students are provided with dedicated and timetabled sessions to prepare to search and secure a year in industry. Problem solving classes, Masterclasses, Career	Formative module feedback through session tasks and exercises

	development programmes, Independent research.	
4. Recognise suitable plans for transitioning into a placement	Students are provided with dedicated and timetabled sessions to prepare to search and secure a year in industry. Problem solving classes, Masterclasses, Career development programmes, Independent research.	Formative module feedback through session tasks and exercises
On Placement		
1. Apply the theoretical and practical aspects of the material studied at the University and demonstrate the personal and professional skills necessary for your role within the organisation.	Students undertake a minimum of 9 months experience in the workplace. Project supervision, independent research	Completion of Monthly Reflective Journals to record skills development, major achievements, key areas of work, learning points and challenges overcome. Assessed by a Placement Portfolio, comprising of a Reflective Summary, Professional Development Plan, and Updated CV (excluded from word count) to formally assess on a pass or fail basis. Formative feedback during a Placement Visit (in person or via Skype) from Placement Provider and Placement Tutor regarding reflection on skills development, areas of strength and weakness and contribution to the workplace.
2. Compose a Professional Development Plan considering your strengths, development areas and motivations for your next step	Students undertake a minimum of 9 months experience in the workplace. Project supervision, independent research	Completion of Monthly Reflective Journals to record skills development, major achievements, key areas of work, learning points and challenges overcome. Assessed by a Placement Portfolio, comprising of a Reflective Summary, Professional Development Plan, and Updated CV (excluded from

		<p>word count) to formally assess on a pass or fail basis.</p> <p>Formative feedback during a Placement Visit (in person or via Skype) from Placement Provider and Placement Tutor regarding reflection on skills development, areas of strength and weakness and contribution to the workplace.</p>
<p>3. Modify your CV to include the skills and experience you have gained through your significant experience gained in the past 12 months.</p>	<p>Students undertake a minimum of 9 months experience in the workplace.</p> <p>Project supervision, independent research</p>	<p>Completion of Monthly Reflective Journals to record skills development, major achievements, key areas of work, learning points and challenges overcome.</p> <p>Assessed by a Placement Portfolio, comprising of a Reflective Summary, Professional Development Plan, and Updated CV (excluded from word count) to formally assess on a pass or fail basis.</p> <p>Formative feedback during a Placement Visit (in person or via Skype) from Placement Provider and Placement Tutor regarding reflection on skills development, areas of strength and weakness and contribution to the workplace.</p>

Year Abroad

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
On completion of the year abroad students can be expected to:		

<ol style="list-style-type: none"> 1. Reflect on skills learned and knowledge gained and explain how these may contribute to future academic development. 2. Demonstrate improved professional communication, presentation and interpersonal skills, networking skills and, if relevant, skills in another language. 3. Demonstrate a range of self-management and life-long learning skills including time management, adaptability, confidence, independence and enterprise. 	<p>Global Success toolkit (including written guidance and workshops to be delivered in partnership with CDS).</p> <p>Experience of living and studying overseas.</p> <p>Experience of studying in an overseas institution.</p>	<p>Updated Curriculum Vitae (not formally assessed).</p> <p>Seminar presentations and contributions to tutorials during final year of study at UoL.</p> <p>Assessments undertaken overseas.</p>
---	--	---

10. Progression points

This programme follows the standard Scheme of Progression set out in [Senate Regulations](#) – see the version of Senate Regulation 5 governing undergraduate programmes relevant to the year of entry.

The following additional progression requirements for this programme have been approved:

- A key progression point is the requirement to pass the dissertation proposal for GY2414 before progression to GY3420 can be considered. An opportunity to resit is allowed in July; a further fail at this point will result in a resit without residence, with no immediate progression to Year 3. Further failure will trigger a withdrawal from the course.

Progression onto a year in industry

The progression criteria for a ‘year in industry’ programme is to meet the requirements needed to progress to the next level of study as outlined in the University’s Senate 5 Regulations.

Where a degree programme has a requirement from a Professional or Statutory Body (PSRB) for academic attainment for students undertake a year in industry are exempt from the proposed new progression criteria and will continue to uphold existing progression criteria.

A Placement Student will revert back to the degree without Year in Industry if:

1. They fail to secure a year in industry role.
2. They fail to pass the assessment related to the year in industry.
3. The year in industry ends early due to the behaviour of the Placement Student not being in accordance with the University’s Regulations for Students, Student Responsibilities. The Placement Student will need to suspend for the remainder of the academic year. To prevent such an incident from happening, processes are in place to identify any possible issues or concerns early in the year in industry role. This includes a start check, regular communications, visits to the workplace (physical and/or virtual) and evaluation. Communication and contact between the Placement Student, Placement Provider and University provides support should issues arise.
4. They discontinue their Year in Industry. A student can return to their campus-based studies no later than the end of teaching week 2 at the start of the academic year should they decide to discontinue their Year in Industry they should complete a Course Transfer Form. If a

Placement Student decides to discontinue their Year in Industry after this point they will need to suspend their studies for the remainder of the academic year.

Nine months is the minimum time required for a year in industry to be formally recognised. If the year in industry is terminated earlier than 9 months as a result of event outside of the Placement Students control (for example redundancy, or company liquidation), the following process will be adopted:

1. If the Placement Student has completed 1 – 6 months, they will be supported to search for another placement to take them up to the 9 months required for the year in industry to be formally recognised. If the Placement Student does not find a placement to meet this criteria they will be required to suspend and transferred onto the degree without Year in Industry.
2. If the Placement Student has completed 7-8 months, they will be supported to search for another placement to take them up to the 9 months required for the year in industry to be formally recognised. If the Placement Student cannot source an additional placement to take them to 9 months, assessments related to the year in industry will be set for the student to make it possible for the individual learning objectives for the year in industry to be met. This will allow the Year in Industry to be recognised in the degree certificate.
3. A Placement Student will not be permitted to undertake a placement which runs across two academic years.

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course

Progression onto a year abroad

Students need to achieve a credit-weighted average of 55% in the second year of their degree programme, and be carrying no failed modules, in order to progress to the year abroad. Students with mitigating circumstances may request that their circumstances be taken into consideration. The final determination should be made by the relevant Board of Examiners.

A Student will revert back to the without a year abroad variant of the programme if:

1. They pass less than 50% of the equivalent of 120 UoL credits.
2. They pass between 50 and 80% of the equivalent of 120 UoL credits and do not pass a resit.
3. The year abroad ends early due to the behaviour of the Student not being in accordance with the University's Regulations for Students, Student Responsibilities. The Student will need to suspend for the remainder of the academic year. To prevent such an incident from happening, processes are in place to identify any possible issues or concerns during the risk assessment process, and via monitoring checks during the year abroad. Communication and contact between the Student, the host university and UoL will ensure support is provided should issues arise.
4. The student discontinues their year abroad. A student may return to their campus-based studies no later than the end of teaching week 2 at the start of the academic year should they decide to discontinue their year abroad, and should complete a Course Transfer Form. If a student discontinues their year abroad after the end of teaching week 2 at Leicester and before the end of their first semester abroad, they will be required to suspend their studies for the remainder of the academic year and transfer to the standard variant of their degree.

Where a student successfully completes the first semester of their year abroad, but discontinues their placement prior to completion of the full academic year for any reason, consideration may be given to the awarding of a 'with a semester abroad' degree programme, as set out below:

- If a Student completes the first semester of their year abroad and subsequently discontinues prior to the end of their second semester, they will be required to suspend their studies for the remainder of the academic year, but will be deemed to have met the requirements to transfer to a 'with a semester abroad' variant of their degree programme if they have passed the equivalent of 48 UoL credits.
- If the student has passed between 30 and 48 UoL credits, they may undertake resit opportunities offered by the host university where possible.
- If the student is not able to undertake resit assessments via their host university, fails resits, or passes fewer than the equivalent of 30 UoL credits, they will revert to the standard variant of their degree.

a) Course transfers

Course transfer to other Geography programmes including the year in industry will be considered at the end of year 1. Transfer to the year abroad programme may be possible in year 2.

11. Criteria for award and classification

This programme follows the standard scheme of undergraduate award and classification set out in [Senate Regulations](#) – see the version of *Senate Regulation 5 governing undergraduate programmes* relevant to the year of entry.

12. Special features

Study in the field remains an integral part of the geography curriculum and the department runs field courses to a number of destinations around the world. Staff are engaged in internationally recognised research in the three principal areas of geography: Human Geography, Physical Geography, and Earth Observation and Geographical Information Science, specialising in Environment and Social Justice, Everyday Geopolitical lives, Planetary Urban and Rural Transformations, forests and Peatlands and Environmental Processes and Change.

Placements

It is the student's responsibility to secure a year in industry role. Students should attend Placement Preparation modules, additional support workshops and 1-2-1 appointments with the Career Development Service. Employer led activities provide a platform for students to engage with organisations who are recruiting students for year in industry roles.

When a Placement Student starts a year in industry, they will be required to complete health and safety documents and confirm they have completed a formal induction process no later than the 2nd week of placement. A Placement Student on the Year in Industry variant will also gain from being able to:

1. Apply the theoretical and practical aspects of the material studied at the University and demonstrate the personal and professional skills necessary for your role within the organisation.
2. Compose a Professional Development Plan considering your strengths, development areas and motivations for your next step
3. Modify your CV to include the skills and experience you have gained through your significant experience gained in the past 12 months

Year Abroad

It is the student's responsibility to apply for a year abroad, and to comply in full with the

preparation process, which includes

- Attendance at the 'What's next?' talk, delivered in February
- Attendance at pre-departure talks/events
- Compliance with the risk assessment process

Students will be offered additional pre-departure workshops on intercultural competence, and post-placement workshops on employability.

13. Indications of programme quality

External Examiner's reports have repeatedly praised the breadth of the education, the range of assessment types and the dedication of the staff.

14. External Examiner(s) reports

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports for this programme can be found at exampapers@Leicester [log-in required]

Programme Specification (Undergraduate)

FOR ENTRY YEAR: 2022/23

Date created: 23/12/20 Last amended: 02/03/2022 Version no. 1

Appendix 1: Programme structure (programme regulations)

The University regularly reviews its programmes and modules to ensure that they reflect the current status of the discipline and offer the best learning experience to students. On occasion, it may be necessary to alter particular aspects of a course or module.

Updates to the programme

Academic year affected	Module Code(s)	Update
2022/23	GY1422	Module name changed to 'Skills for Professional Geographers'

BA Geography

Level 4/Year 1 2022/23

Credit breakdown

BA Geography with a Year Abroad

Approved institutions for Geography include those listed at <http://www2.le.ac.uk/offices/international/overseas-exchange/outgoing/where-can-i-go/exchanges-by-academic-subject/geography>.

FIRST, SECOND AND FOURTH YEAR MODULES

Regulations for the first and second year are the same as for the BA degree in Geography. Regulations for the fourth year of the course are the same as for the third year of the BA degree in Geography.

THIRD YEAR MODULES

The third year will be spent abroad in the USA, Canada, Finland, Spain, Germany and the Netherlands taking approved courses in one of the institutions associated with the Department of Geography. Level 3 modules from the Geography and Environmental Sciences Departments of the host Institution, plus introductory language modules, to the same overall credit value per year as Leicester. A small proportion of modules in other subjects may be taken by prior agreement of the International Officer in the Department of Geography, University of Leicester. Students will be required to reach a prescribed level of attainment in the work done abroad (a pass in Leicester terms according to the mark translation). Any student failing the year abroad component will revert back to the standard Leicester variant of their degree.”

Level 6/Year 3 2024/25

THIRD YEAR

Students who gain an industry placement will be assessed as per the standard model for undergraduate placements in the College of Science and Engineering. The marks from this year will not be included in the final degree assessment.

Year long	ADGY223	On Placement	0 credits
-----------	---------	--------------	-----------

FINAL YEAR

Regulations for the fourth year of the course are the same as for the third year of the BA degree in Geography.

Appendix 2: Module specifications

See undergraduate [module specification database](#) (Note - modules are organized by year of delivery).

Appendix 3: Skills matrix
