7. Programme aims

The BA Business & Management programme aims to

- Develop a critical understanding of modern management analysis, ideas and practices and their relevance to a variety of institutional and organisational contexts; to develop quantitative, communications and information technology skills, and the ability to apply these in organisational contexts
- Increase a graduate's marketability by: encouraging intellectual development, critical ability, research skills, communication skills and confidence in problem recognition, formulation and solution; and by promoting awareness of the general business and financial environment and current management issues
- Prepare students for career and training opportunities in management (including marketing, human resource management, finance and accountancy) in the private and public sectors and voluntary organisations; and to prepare those interested in postgraduate study for the transition to an increasingly independent regime of study and research.

The Year Abroad variants also aim to:

- Enable students to experience modern management ideas from a European perspective in a supportive environment.
- Develop students' working knowledge of a European language other than English.

- Encourage a thoughtful and mature approach to all aspects of study and life, creating graduates with broad experiences and horizons.
- Enhance employability of graduates by their knowledge of other contexts of management education, foreign languages and different business cultures.

For those on the Year in Industry, see [additional programme specification content for Year in Industry programme](#).
