Findings from the monitoring report will be categorised as Critical, Major or Other as SOP S-1016 UoL, Procedure in the event of non-compliance in clinical research. Response to all findings will be required in the format of a CAPA Corrective Action Preventative Action plan. A summary of all findings will be entered into a plan and submitted to the Principal Investigator for action. The CAPA must be returned to the Sponsor within 4 weeks of issue. This requires the CI / PI to explain what action they will take, not necessarily take the action at that point in time. The CAPA will be followed up by the Sponsor until completion/closure.

Critical

- The safety, well-being or confidentiality of participants has been jeopardised.
- Reported data are unreliable or absent.
- Inappropriate, insufficient or untimely action has been taken place regarding a major non-compliance.
- Where there are a number of Major non-compliances across areas of responsibility, indicating a systematic quality assurance failure.
- Provision of the Trial Master File (TMF) does not comply with Regulation 31A 1-3, as the TMF is not readily available or accessible, or the TMF is incomplete to such an extent that it cannot form the basis of inspection and therefore impedes or obstructs inspectors carrying out their duties in verifying compliance with the regulations.

Major

- Significant and unjustified non-compliance with relevant legislation or Good Clinical Practice (ICH GCP)
- A number of breaches of legislation or GCP within one area, indication quality assurance failure
- A failure to comply with legislative requirements including annual reporting requirements
- Multiples findings in this category have the potential to escalate to a Critical finding.

Other

- Findings that are neither Major nor Critical.
- Multiples findings in this category have the potential to escalate to a Major finding.
