

Serious Adverse Event Report Form B

For all UoL sponsored studies EXCLUDING clinical trials of investigation medicinal products

Guidance document

This form is for the reporting of serious adverse events in studies that **DO NOT** involve investigational medicinal products. **If your study involves investigational medicinal products you must use SAE report form A**

All serious adverse events **MUST** be reported within **24 hours** of the research team becoming aware of the event. The initial report may be submitted without a PI/delegated medic signature, but **must be** followed up with a signed copy within 7 days.

Once a signed initial report is received, a follow up or final report should be submitted within 28 days. The reporting person(s) will receive an 'acknowledgment of receipt' email from the Sponsor following the submission of each report. This will contain the date by which a follow-up or final report should be submitted, and details of any additional queries raised. Response to the request is required as per the timelines dictated in the email. If the participant is still an inpatient, or there is an unavoidable delay in the provision of further information, email rgosponsor@le.ac.uk.

Please return the completed form and any anonymised copies of supporting documents to
rgosponsor@leicester.ac.uk

Area of report	Information Required
Sponsor ref	Study identifier given by the Sponsor. This can be found on the Sponsor green light letter and is usually four numbers. This MUST be given to enable sponsor to identify the trial.
Study title/Acronym	Full or short version of the study title as entered on the IRAS form.
Study number/initials	Unique subject identifier and subjects initials.
Centre	Centre name and/or number. (If numbers are utilised please ensure that the Sponsor is provided with a listing of corresponding centre names)
SAE ID	This number is allocated by the Sponsor following the submission of an initial report to be added to follow-up or final reports only

No other patient identifiable data must be entered on this form

Area of report	Information Required
<p>1. Type of report</p>	<p>Select one option from the list below</p> <p>Initial report The first time you are reporting an event, this may be a signed or unsigned report. At this time point either not all details are available, the form is unsigned, or the event is marked as ongoing.</p> <p>Follow-up report Follow-up information to an initial report is being provided. The event may still be ongoing or even resolved and further information relating to the event is still required. Follow-up reports must be submitted until the resolution of the event or all information has been provided. Please enter the number of the follow-up report e.g. if an initial report has been submitted and this is the first follow-up report put '1' in the box. If an initial and a follow-up report has previously been submitted and this is a further follow-up, please put a '2' in the box etc.</p> <p>Final report When all follow-up information is available for this serious adverse event and the outcome for the event has been completed.</p> <p>Initial and final report All information about the SAE is available and the outcome of the event is known. The SAE is therefore considered to be complete on the submission of this report.</p>
<p>Date of report</p>	<p>Date you are completing this specific SAE report. This should be updated each time an additional report e.g. follow-up, final or amended report is submitted.</p>
<p>Title of serious adverse event</p>	<p>Enter keywords that best summarise the event e.g. chest pain. Multiple serious adverse events MUST be reported on individual forms.</p>
<p>Date of onset</p>	<p>Date of onset of the reported event. This should be the date of onset of the initial symptoms which may be prior to the event becoming an SAE e.g. if a person suffers for three days with abdominal pain prior to being hospitalised. The onset date should be the date when they first started experiencing abdominal pain. If a full date is not known then UN/MM/YYYY should be completed.</p>
<p>Date study team aware</p>	<p>The date that the event was reported to/or the study team became aware of the event. The SAE must be submitted within 24 hours of this date.</p>
<p>2. Seriousness criteria</p>	<p>Select one option from the list. If the event fits more than one criteria, choose the most significant one. Multiple Serious Adverse Events MUST be reported on individual forms. If 'other' is selected, please specify e.g. adverse event of special interest.</p>
<p>3. Narrative</p>	<p>If the SAE is due to an admission to hospital, provide the admission and discharge dates. In the narrative box, provide an account of the event, similar to that of a discharge summary. The description must have sufficient details for evaluation by the individual(s) reviewing the SAE, who may not be experts in the disease area. Abbreviations of clinical conditions should not be used. Summarise any relevant laboratory or diagnostic tests. Include details of discharge if appropriate. Please provide any anonymised supporting documents as appropriate e.g. copies of CT scans/blood results. If extra space is required for the narrative section, please use a separate continuation sheet (SOP S-1009 Appendix 8) and submit alongside the SAE report.</p>
<p>4. Was the event related to a study device/procedure or intervention</p>	<p>This question must be completed by the PI or qualified and delegated medic. Answer Yes† or No box as appropriate. If Yes, document the safety implications and how these will be addressed i.e. protocol amendment. If no, mark as N/A. †If the SAE is related to the research procedure(s) and is unexpected (i.e. it is not listed in the protocol as expected) a HRA Serious Adverse Event form must be submitted to</p>

	<p>the Research Ethics Committee that gave a favourable opinion of the research within 15 days of the CI becoming aware of the event.</p> <p>The form can be accessed via the HRA website.</p>
5. Event severity	<p>Select one option from the list.</p> <p>Mild Moderate Severe</p>
6. Event related to protocol deviation	<p>Answer Yes or No.</p> <p>If Yes - Further information should be supplied on a separate protocol deviation form/File note.</p>
7. Patient withdrawn	<p>Answer Yes or No</p>
8. Outcome	<p>Select one option from the list.</p> <p>Resolved - The serious adverse event has resolved e.g. patient has been hospitalised, received treatment and the event has resolved. Provide details of the date of resolution of the SAE.</p> <p>Resolved with sequelae – The serious adverse event has resolved but there are still some residual problems as a result of the SAE e.g. the patient hospitalised for DVT and then discharged on warfarin. The patient no longer requires hospital treatment but the pre-existing symptoms persist.</p> <p>Ongoing – The serious adverse event has not resolved at this time. This will require follow up until resolution of event.</p> <p>Unknown at present - Information is not available at the present time. Further information MUST be supplied until resolution of event.</p> <p>Fatal - Where the event is fatal details of the date of death and the cause of death MUST be obtained.</p>
Cause of death	<p>Name the cause of death</p>
Cause of death obtained from	<p>Select where the information was obtained to support cause of death. Supporting documents* to be supplied with SAE.</p> <p>*Note all supporting documentation must have all patient identifiable data removed. The documents MUST only be identified with the addition of the patient study ID and initials.</p>
9. Reporting person	<p>Supply full details as indicated of the person reporting the event.</p> <p>Please ensure contact phone number and/or email address are complete.</p> <p>The signature should be 'wet ink' rather than electronic.</p>
Principal investigator/delegated medically qualified individual	<p>Supply full details. Please note the person signing this form must be either the Principal Investigator or a medically qualified individual as agreed by Sponsor to undertake this role. The person must be named and delegated the duty on the delegation of authority log.</p> <p>The signature should be 'wet ink' rather than electronic.</p>
10. Relatedness sign off	<p>To be signed by the delegated individual who conducted the causality/expectedness section of the reporting form</p>

Reporting and completion of SAEs not involving investigational medicinal products must be undertaken in accordance with SOP S-1009 – Processing and Reporting of Serious Adverse Events, Serious Adverse

Reactions and Suspected Unexpected Serious Adverse Reactions for all Research Sponsored by the University of Leicester (UoL).
