### 7. Programme aims

The programme aims to provide students with a comprehensive grounding in theories, perspectives and research related to globalization, global media and communications. The programme's core focus is on the different political, economic and cultural dynamics of national and transnational

media and communications. Through a variety of core and optional modules, students on this programme will critically consider the role of media and communications technology in shaping cultures and societies, influencing development processes and linking different transnational communities. The programme helps students to understand more fully how media and communications are central to the changing structures, boundaries and flows of our increasingly globalized world. The programme also pays particular attention to global development and inequalities, and the ways in which communication processes can be seen to both widen and close the gap between the global 'north' and 'south'.

Teaching on the programme is done by a combination of lectures, seminars, workshops and tutorials. Assessment is by means of essays, research methods assignments and a dissertation.

#### Course Objectives

At the end of the course students should have an understanding of:

- The relationship between processes of globalization, media and communications and their diverse impacts on social change.
- Communication and its impact on processes of global development.
- Contemporary historical processes shaping globalization and the digital era, the changing roles of states and corporations in this context and the emergence of global civil society
- Evolving patterns of cultural production and consumption and transformations in the global media environment, including processes of conglomeratization, digitalization and convergence.
- Relationship of communications to contemporary identity issues, including in relation to diasporic and new virtual communities.
- Evolving nature of global public sphere and civil society and potential use of new media for social movements and democratization.
- The range of research skills and methodologies required for systematic analysis of these developments.

**10. Special features**

- Distinct focus on the relationship between processes of globalization, media and communications and their diverse impacts on social change
- Provides analytical and research skills to face contemporary and historical processes shaping globalization in the digital era.
- Graduates have gone onto jobs including digital media organisations, press and broadcast organisations, international news agencies, government departments, advertising firms and public relations organisations.
- Emphasis on research methods also provides a solid foundation for students who wish to continue to research at doctoral level.

**11. Indicators of programme quality**

The programme has consistently received high praise from external examiners and student evaluations indicate that students both enjoy their studies as well as achieving excellent learning outcomes. Students who have completed our programmes have gone on to successful careers in academia, teaching, commercial research, and a wide range of media and media-related occupations.

**12. Criteria for award and classification**

This programme follows the standard scheme of taught postgraduate award and classification set out in [Senate Regulations](#) – see the version of *Senate Regulation 6 governing taught postgraduate programmes of study* relevant to year of entry.

### **13. Progression points**

As defined in [Senate Regulations](#) - refer to the version of *Senate Regulation 6 governing taught postgraduate programmes of study* relevant to year of entry.

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course and a recommendation will be made to the Board of Examiners for an intermediate/exit award where appropriate.

### **14. Rules relating to re-sits or re-submissions**

As defined in [Senate Regulations](#) - refer to the version of *Senate Regulation 6 governing taught postgraduate programmes of study* relevant to year of entry.

### **15. External Examiners reports**

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports for this programme can be found at [exampapers@Leicester](mailto:exampapers@Leicester) [log-in required]

### **16. Additional features (e.g. timetable for admissions)**

Admissions are in September and January.

Students admitted in September undertake their dissertation during the summer of the following year and submit their dissertation in September (12 months in total).

Students admitted in January start by following semester 2 modules and break during the summer; in the following September they follow semester 1 modules and start their dissertation in January of the following year, submitting their dissertation at the end of May. Although this implies 16 months in total, only 12 are actually spent in the course.
