7. Programme aims

The MA Media and Advertising is designed to equip the students with both the theoretical and the practical research skills to understand and critically evaluate one of the most creative

promotional industries in the world: advertising. The MA explores this dynamic phenomenon from different standpoints and uses multidisciplinary approaches deriving from Media, Communication and Cultural Studies, as well as Marketing and Consumer Studies. It is taught with a range of different interrelated approaches and this ensures that the students will grasp advertising in its complexity: as a cultural phenomenon that plays a crucial role in contemporary societies, as well as a marketing tool that promotes brands, but also political ideas and no-profit messages.

10. Special features

The course will include regular talks by experts from the advertising, public relations and marketing industry.

10a. Research-inspired Education

Students on this programme will advance through the four quadrants of the University of Leicester Research-inspired Education Framework as follows:

RiE Quadrant	Narrative
Research-briefed Bringing staff research content into the curriculum.	Research-briefed: Students will be exposed to stimulating, interactive as well as practical classes and seminars via course content and teaching practices, informed by the diverse research expertise of academic instructors, all of whom belong to one or more specialist research clusters within the School. All staff members lecturing on the programme modules have been engaged in research, and bring their knowledge and experiences into their teaching and supervision.
Research-based Framed enquiry for exploring existing knowledge.	Research-based Assessment includes students conducting case study report and analysis, engaging in both individual and group presentations of a selected advertising campaign and/or creative brief production. Through seminars and workshops, they will practice and perfect research, critical and oral skills, that they will put into practice to identify case

	studies, evaluate advertising campaigns strategies as well as interpret advertising representation and communication.
Research-oriented Students critique published research content and process.	Research-oriented: Students are expected to critically discuss published research through short essay responses, reading summaries and longer essay analyses, while also reflecting on their own research methods and analytical approaches through reflective portfolios and reports. Additionally, for both their research proposal and final dissertation, students will have to develop a body of literature review from a critical standpoint.
Research-apprenticed Experiencing the research process and methods; building new knowledge.	Research-apprenticed: Through assignments ranging from critical / reflective essays to research design exercises and production of creative briefs, students deepen their analytical and presentation skills, their knowledge and understanding of the appropriate methodological tools for collecting and analysing data, as well as their capacity to structure and develop supported arguments. For their final dissertation, students will develop an initial research proposal, improve their research design according to their assigned supervisor's critical feedback and carry out their investigation. If necessary, students will also have supervision and guidance for the process of obtaining ethics approval for their study.

As part of studying at a research-intensive university, students on this programme have the following extra or co-curricular opportunities available to them to gain exposure to research culture:

Students are offered the chance to engage in useful exchange, workshops and conversations with members of the academic and creative communities at the 'Festival of Media Stories', a media and networking event that aims at encouraging students to learn about new research initiatives and projects and, also, to apply their academic knowledge as well as critical skills in real-life contexts and situations.

Specifically for the Media and Advertising Programme, professionals from advertising agencies are invited as guest speakers to contribute their knowledge and experience in market and consumer research and relevant promotional practices.

Teaching on this programme will be research-informed (it draws consciously on systematic inquiry into the teaching and learning process itself) in the following way:

The School supports all staff involved in teaching to gain an accredited Higher Education teaching qualification (through both PGCAP and HEA Fellowship routes), in which they demonstrate their use of teaching theory to support their own practice and reflect on their current teaching and continuing professional development.

Staff members on the programme participate in academic training from the university (e.g. dedicated workshops, group seminars) that updates their knowledge of best practice for educational purposes. Additionally, module leaders, instructors and tutors engage in School level annual teaching awaydays, as well as subject division and programme team meetings, for continual pedagogical discussion and development.

Across the programme team there is engagement with national subject-relevant educational organisations (e.g. Association of Journalism Education) and staff have also been involved in QAA Subject Benchmark statement authorship for Communication, Media, Film and Cultures.

11. Indicators of programme quality

The programme will be taught by a department with an extensive track record in PGT provision and will in part be informed by established provision that has been quality assessed. In addition, the programme will be kept under ongoing review and development. This will be informed by consultation with advertising professionals and industry bodies as well as feedback from external examiners.

12. Criteria for award and classification

This programme follows the standard scheme of taught postgraduate award and classification set out in [Senate Regulations](#) – see the version of *Senate Regulation 6 governing taught postgraduate programmes of study* relevant to year of entry.

13. Progression points

As defined in [Senate Regulations](#) - refer to the version of *Senate Regulation 6 governing taught postgraduate programmes of study* relevant to year of entry.

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course and a recommendation will be made to the Board of Examiners for an intermediate/exit award where appropriate.

14. Rules relating to re-sits or re-submissions

As defined in [Senate Regulations](#) - refer to the version of *Senate Regulation 6 governing taught postgraduate programmes of study* relevant to year of entry.

15. External Examiners reports

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports for this programme can be found at exampapers@Leicester [log-in required]

16. Additional features (e.g. timetable for admissions)

Admissions are in September and January.

Students admitted in September undertake their dissertation during the summer of the following year and submit their dissertation in September (12 months in total).

Students admitted in January start by following semester 2 modules and break during the summer; in the following September they follow semester 1 modules and start their dissertation in January of the following year, submitting their dissertation at the end of May. Although this implies 16 months in total, only 12 are actually spent in the course.
