With optional Year in Industry or Year Abroad (in Europe, USA or Japan)

a) [HECOS Code](#)

Programme	HECOS Code	%
Biological Sciences BSc	100345	100 %
Biological Sciences (Biochemistry) BSc	100344	67 %
	100345	33%
Biological Sciences (Genetics) BSc	100259	67%

b) UCAS Code (where required)

C100

C700

C400

C500

B140

B1B2

C300

2. Awarding body or institution:

University of Leicester

3. a) Mode of study

Full-time

b) Type of study

Campus-based

4. Registration periods:

The normal period of registration is three years (four years for degrees 'with a year in industry/abroad')

The maximum period of registration five years (six years for degree 'with a year in industry/abroad')

5. Typical entry requirements

A-levels: typical offer AAB/ABB, normally including at least two relevant science subjects from Biology (preferred), Chemistry, Physics or Maths.

EPQ with A-levels: typical offer BBB + EPQ at grade B. A-level subjects to include two relevant science subjects from Biology (preferred), Chemistry, Physics or Maths. General Studies not accepted.

GCSE: At least Grade C in both English Language and Maths (if not held at A-level)

Access to HE Diploma: Pass relevant diploma with 45 credits at level three, with distinctions in some subjects.

International Baccalaureate: Pass Diploma with 32/30 points, including at least two relevant science subjects at Grade 6 at higher level.

BTEC Nationals: Pass relevant Diploma with DDD plus five GCSEs at B or above including two relevant sciences.

6. Accreditation of Prior Learning

Direct 2nd year entry is considered subject to completion of a level 4 programme of comparable content to those studies in year 1 of this programme, passing all modules and with a year mark of at least 65%.

7. Programme aims

The programme aims to provide:

- a flexible teaching and learning programme of high quality that is informed by an active research environment in which students develop their own interests;

- a stimulating and supportive working environment;
- an education that will enable graduates to follow a variety of careers including higher degrees and research;

and to enable students to:

- have a broad appreciation of biological sciences or of biomedical and related disciplines with an emphasis on human health and disease, and advanced knowledge of one or more areas including appreciation of aspects of the underpinning research;
- develop a range of skills including practical and transferable skills;

In addition, for the 'with a Year abroad' variants

- The 'Year Abroad' variant of this programme is offered in accordance with the University's standard specification for the experiential year abroad variant.

In addition, for the 'with Industry' variants

- The 'Year in industry' variant of this programme is offered in accordance with the University's standard specification for year in industry programme variants.
- To provide experience of applications of professional and discipline-specific skills in Industry and to reinforce knowledge through its use in different environments.

8. Reference points used to inform the programme specification

- QAA Benchmarking Statement
- Framework for Higher Education Qualifications (FHEQ)
- UK Quality Code for Higher Education
- [University Education Strategy](#)
- [University Assessment Strategy](#) [login required]
- University of Leicester Periodic Developmental Review Report
- External Examiners' reports (annual)
- United Nations Education for Sustainable Development Goals
- Student Destinations Data
- Relevant information from learned societies

9. Programme Outcomes

Unless otherwise stated, programme outcomes apply to all awards specified in 1. Programme title(s).

a) Discipline specific knowledge and competencies

i) Mastery of an appropriate body of knowledge

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate an awareness of main principles of biological sciences, biomedical sciences and related disciplines and explain core concepts of their chosen discipline. Describe current areas of advance in their chosen specialisation(s).	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination, coursework (e.g. practical reports, written reports, data analysis, field reports, oral presentations, group reports, video production, poster production, dissertation)

ii) Understanding and application of key concepts and techniques

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Describe and apply safely appropriate experimental procedures in biological sciences, biomedical sciences and related disciplines. Apply a scientific approach to the solution of problems in the context of their chosen specializations and appreciate the rationale of experimental design. Explain core concepts of their chosen discipline.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

iii) Critical analysis of key issues

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate a capacity for scientific analysis of issues in the context of biological sciences, biomedical sciences and related disciplines.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

iv) Clear and concise presentation of material

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Communicate orally and in writing concepts and arguments in biological Sciences, biomedical sciences and related disciplines.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

v) Critical appraisal of evidence with appropriate insight

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate the capacity to analyse and criticise evidence from both experimental procedures and the literature.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

vi) Other discipline specific competencies

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
In the year in industry/abroad programmes, demonstrate the capacity to work in an industrial or other research laboratory or study in another European, American or Japanese University.	Laboratory work, research project	Research report, practical reports

b) Transferable skills

i) Oral communication

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Communicate orally, with clarity and coherence, concepts and arguments in biological sciences, biomedical sciences and related disciplines.	Tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work.	Oral presentations, group reports, tutorials.

ii) Written communication

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Communicate in writing, with clarity and coherence, concepts and arguments in biological sciences, biomedical sciences and related disciplines.	Tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work.	Examination and coursework

iii) Information technology

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate the effective use of IT for accessing databases and scientific literature; manipulating, processing and presenting data; presenting written assignments.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

iv) Numeracy

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Understand and manipulate numerical data, solve problems using a variety of methods and apply numerical and statistical techniques to data analysis.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

v) Team working

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate the ability to work as part of a group	Tutorials, group work, research projects.	Group reports, use of class data to generate practical reports

vi) Problem solving

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Apply a scientific approach to the solution of problems in the context of their chosen specialisations and appreciate the rationale of experimental design.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

vii) Information handling

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate the capacity to access a variety of resource materials and to analyse evidence from both experimental procedures and the literature.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

viii) Skills for lifelong learning

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
Demonstrate the acquisition of the skills and attributes necessary for lifelong learning, including: intellectual independence, effective time management, the ability to work as part of a team, the use of IT and the capacity to access and utilise a variety of resource materials.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork (where appropriate), research projects, group work, directed reading, resource-based learning, private study, career development programme.	Examination, coursework, personal development planning.

Year Abroad

[In addition, for the 'with a Year abroad' variants the additional programme outcomes apply](#)

Year in Industry

[In addition, for the Year in Industry' variants the additional programme outcomes apply](#)

10. Progression points

This programme follows the standard Scheme of Progression set out in [Senate Regulations](#) – see the version of Senate Regulation 5 governing undergraduate programmes relevant to the year of entry.

The following dispensations from Senate Regulation 5 have been approved by the University:

The following modules on these programmes are not eligible for compensation and must be passed at the relevant pass mark (40% at Levels 4-6) for the degree to be awarded:

- BS3101 - Experimental Research Project A
- BS3102 - Experimental Research Project B
- BS3201 - Analytical Research Project
- BS3301 - Education Research Project A

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course.

Year Abroad

For the Year Abroad variant (for experiential Year Abroad only) [the additional progression points apply](#)

Year in Industry

For the Year in Industry variant, the [additional progression points apply](#)

11. Criteria for award and classification

This programme follows the standard scheme of undergraduate award and classification set out in [Senate Regulations](#) – see the version of *Senate Regulation 5 governing undergraduate programmes* relevant to the year of entry – with the following approved exception:

To gain the Royal Society of Biology accredited degree of BSc Biological Sciences (with/without specialisms) students must pass the project module/s (BS3101/2, BS3201, BS3301/3102) with a mark of 40.00% or higher. Students who meet all other progression and awarding regulations but fail to

meet this accreditation requirement may be awarded a non-accredited degree in Biosciences with/without relevant specialism.

12. Special features

Students receive a broad education in biological sciences, biomedical sciences and related disciplines in the first year, along with training in key skills. As the course progresses into the second and third years the students have the flexibility to specialise progressively within the specified subject streams or to retain a broader perspective. Opportunities are available to take placements within related industries, or to study in other European, American or Japanese universities.

The School has a strong reputation for research and the range of staff expertise enables provision of research-led programmes that offer breadth and depth.

BS2030 and MB2020 are co-requisites for BS2033, and there is a cap of 20 on the BS2033 module, selected on a first come first served basis.

For the Year Abroad variant (for experiential Year Abroad only) [the additional Special Features apply](#)

For the Year in Industry variant. The University recognises that undertaking a work placement as part the programme of study can enhance career prospects and provide added value, and as such this programme includes a 'year in industry' variant.

By experiencing real-world scenarios and applying skills and knowledge to a professional environment, students can gain a unique insight into how their studies can be utilised in industry. This will not only showcase their abilities to future employers but will also enhance their studies upon returning to university to complete your programme.

To understand the special features for year in industry undergraduate programme variants, this programme specification should be read in conjunction with the [programme specification content which can be found here](#). This outlines details including programme aims, support, progression and duration.

12a. Research-inspired Education

Students on this programme will advance through the four quadrants of the University of Leicester Research-inspired Education Framework as follows:

RiE Quadrant	Narrative
Research-briefed Bringing staff research content into the curriculum.	Research-briefed: Staff introduce their research interests to each student cohort, linking their research to relevant teaching topics. All lecture-based modules include information on research that underpins current knowledge. First-year modules feature "flagship" lectures from leading researchers, demonstrating how fundamental knowledge and skills are applied in cutting-edge research. In later years, specialised modules reflect staff research programmes. Practical classes, workshops, and authentic assessments are based on real-world research.
Research-based Framed enquiry for exploring existing knowledge.	Research-based: From Year one, students engage in laboratory and fieldwork, gaining insight into the scientific method, hypothesis testing and data handling. Experimental and research study design are formally taught and practiced in Year 2, through core <i>Research Skills</i> modules where students work in teams to devise and present original research proposals.
Research-oriented	Research-oriented: Familiarity with research publications is introduced in Year 1 tutorials and builds throughout our programmes, particularly in the Year 2 <i>Research Skills</i> modules. In year three, students critically evaluate published research through essays, articles, presentations and debates. The third-year project requires

Students critique published research content and process.	students to frame their research within the context of existing knowledge via a literature review, emphasising the provisional and incomplete nature of scientific knowledge.
Research-apprenticed Experiencing the research process and methods; building new knowledge.	Research-apprenticed: In the third-year capstone project, students build on their prior learning to create new knowledge. Experimental projects may involve laboratory, field or computer-based work, generating and analysing novel data. Analytical projects answer scientific questions through systematic literature reviews, meta-analyses, surveys, and/or new analysis of provided data. Education projects enable students to conduct research in local schools or colleges.

As part of studying at a research-intensive university, students on this programme have the following extra or co-curricular opportunities available to them to gain exposure to research culture:

Students receive an annual Research Newsletter summarising recent research and linking to publications by staff who teach on the programme, highlighting their high-profile research and impact on society, the economy and healthcare. This is designed to encourage students to apply for a range of summer research internships, which may be funded by learned societies. Students are supported to identify and apply to internal and external research internships and summer research programmes by a dedicated member of our academic staff.

Teaching on this programme will be research-informed (it draws consciously on systematic inquiry into the teaching and learning process itself) in the following way:

The School of Biological Sciences supports all staff involved in teaching to gain a recognised Higher Education teaching qualification in which they demonstrate their use of teaching theory to support their own practice and reflect on their current teaching and continuing professional development. We also run a regular 'BioEd matters' seminar and workshop series in which internal and external speakers present pedagogical research, report back on teaching conferences and teaching innovations, and support best practice through reflection and evaluation.

13. Indications of programme quality

External examiner evaluations.

Oversight by Programme Team, School Education Committee and Education Quality, Enhancement and Development Team.

14. External Examiner(s) reports

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports for this programme can be found at exampapers@Leicester [log-in required]

Programme Specification (Undergraduate)

FOR ENTRY YEAR: 2025/26

Date created: 20/12/2022

Last amended: 16/12/2024

Version no. 1

Appendix 1: Programme structure (programme regulations)

The University regularly reviews its programmes and modules to ensure that they reflect the current status of the discipline and offer the best learning experience to students. On occasion, it may be necessary to alter particular aspects of a course or module.

Updates to the programme

Academic Year	Module	Change
2026/27	BS2093 Protein Structure and Function	Previously Protein Control in Cellular Regulation
2027/28	Students taking an Education Research Project	Students will take BS3301 Education Research Project A and BS3102 Experimental Research Project B

Please see [Section B](#) for option modules

Option Modules – Year 2

All Programmes

Please see the table below for available options in the second year of your programme. N.B. Options are subject to timetabling constraints. All modules are 15 credits.

Key

C100 = Biological Sciences BSc

C700 = Biological Sciences (Biochemistry) BSc

C400 = Biological Sciences (Genetics) BSc

C500 = Biological Sciences (Microbiology) BSc

B140 = Biological Sciences (Neuroscience) BSc

B1B2 = Biological Sciences (Physiology with Pharmacology) BSc

C300 = Biological Sciences (Zoology) BSc

Delivery period	Code	Module title	C100	C700	C400	C500	B140	B1B2	C300
Semester 1	BS2009	Genomes	*	*		*	*	*	*
Semester 1	BS2013	Physiology and Pharmacology	*	*	*	*			*
Semester 1	BS2015	Physiology of Excitable Cells	*	*	*	*			*
Semester 1	BS2030	Principles of Microbiology	*	*	*		*	*	*
Semester 1	BS2059	Global Change Biology and Conservation	*	*	*	*	*	*	
Semester 1	BS2093	Protein Structure and Function	*		*	*	*	*	*
Semester 1	BS2094	Introduction to Python programming for Bioscientists	*	*	*	*	*	*	*
Semester 1	MB2020	Medical Microbiology	*	*	*		*	*	*
Semester 2	BS2004	Contemporary Techniques in Biological Data Analysis	*	*	*	*	*	*	*

Delivery period	Code	Module title	C100	C700	C400	C500	B140	B1B2	C300
Semester 1	BS2092	Molecular and Cell Biology	*		*	*	*	*	*
Semester 2	BS2014	Exercise Physiology and Pharmacology	*	*	*	*	*		*
Semester 2	BS2026	Genes, Development and Inheritance	*	*		*	*	*	
Semester 2	BS2032	Immunology and Eukaryotic Microbiology	*	*	*		*	*	*
Semester 2	BS2033	Immunology and Eukaryotic Microbiology (with Science Enterprise Trip)	*	*	*		*	*	*
Semester 2	BS2040	Bioinformatics	*	*		*	*	*	*
Semester 2	BS2066	Behavioural Neurobiology	*	*	*	*		*	
Semester 2	BS2077	Neurobiology and Animal Behaviour	*	*	*	*		*	
Semester 2	BS2078	A Field Guide to Evolution	*	*	*	*	*	*	*
Semester 2	BS2091	From Genes to Proteins	*		*	*	*	*	*

Notes

This is an indicative list of option modules and not definitive of what will be available. Option module choice is also subject to availability, timetabling, student number restrictions and, where appropriate, students having taken appropriate pre-requisite modules.

Option Modules – Year 3/Final Year

All Programmes

Please see the table below for available options in the third year of your programme. N.B. Options are subject to timetabling constraints. All modules are 15 credits.

Key

C100 = Biological Sciences BSc

C700 = Biological Sciences (Biochemistry) BSc

C400 = Biological Sciences (Genetics) BSc

C500 = Biological Sciences (Microbiology) BSc

B140 = Biological Sciences (Neuroscience) BSc

B1B2 = Biological Sciences (Physiology with Pharmacology) BSc

C300 = Biological Sciences (Zoology) BSc

Delivery period	Code	Module title	C100	C700	C400	C500	B140	B1B2	C300
Semester 1	BS3000	Evolutionary Genetics	*			*		*	*
Semester 1	BS3010	Gene Expression: Molecular Basis and Medical Relevance	*			*		*	*
Semester 1	BS3015	Molecular and Cellular Immunology	*			*~		*	*
Semester 1	BS3031	Human Genetics	*			*		*	*
Semester 1	BS3038	Biodiversity in Practice	*			*		*	*^
Semester 1	BS3054	Molecular and Cellular Pharmacology	*			*	*+		*
Semester 1	BS3055	Molecular and Cellular Neuroscience	*			*		*°	*
Semester 1	BS3064	Comparative Neurobiology	*			*	*+	*	*^
Semester 1	BS3068	Microbial Biotechnology	*			*~		*	*
Semester 1	BS3070	Structural Biology	*					*	*

Delivery period	Code	Module title	C100	C700	C400	C500	B140	B1B2	C300
Semester 1	NT3100	Sustainability Enterprise Partnership Project	*			*		*	*
Semester 2	BS3003	Cancer Cell and Molecular Biology	*		*	*	*	*	*
Semester 2	BS3011	Microbial Pathogenesis and Genomics	*	*	*^	*~	*	*	*
Semester 2	BS3013	Human and Environmental Microbiology	*	*	*	*~	*	*	*
Semester 2	BS3016	Neuroscience Futures	*	*	*	*		*	*
Semester 2	BS3033	Physiology, Pharmacology and Behaviour	*	*	*	*		*°	*
Semester 2	BS3056	Cellular Physiology of the Cardiovascular System	*	*	*	*			*
Semester 2	BS3069	Introduction to Astrobiology and the Origin of Life	*	*	*	*	*	*	*
Semester 2	BS3073	Conservation and Ecological Genetics	*	*	*^	*	*	*	
Semester 2	BS3080	Behavioural Ecology	*	*	*	*	*	*	*
Semester 2	NT3200	Sustainability Enterprise Partnership Project	*	*	*	*	*	*	*
Semester 2	MB3057	Current and Future Therapeutics					*	*°	

^ students must choose at least one of the indicated modules

~ students must choose three or four of the indicated modules

+ students must choose one of the indicated modules

° students must choose two or three of the indicated modules

Notes

This is an indicative list of option modules and not definitive of what will be available. Option module choice is also subject to availability, timetabling, student number restrictions and, where appropriate, students having taken appropriate pre-requisite modules.

Appendix 2: Module specifications

See undergraduate [module specification database](#) [log-in required] (Note - modules are organized by year of delivery).
