

Date amended: 13/02/2019

1. Programme Title(s) and UCAS code(s):

BSc Economics L102 BSc Economics with a Year Abroad* BSc Economics with a Year in Industry*

*Students may only enter these degree programmes by transferring after the end of year 1

2. Awarding body or institution:

University of Leicester

3. a) Mode of study:

Full Time

b) Type of study:

Campus based

4. Registration periods:

BSc Economics: The normal period of registration is three years The maximum period is five years

BSc Economics with a Year Abroad /Year in Industry: The normal period of registration is four years. The maximum period of registration is six years.

5. Typical entry requirements:

Three A levels normally considered as a minimum. Two AS levels or vocational AS levels will be considered in place of an A level. General Studies and Critical Thinking not accepted.

A/AS Levels: For BA degrees, ABB or equivalent including Maths GCSE level grade B. For BSc degrees ABB or equivalent including Maths A-Level grade B.

Access to HE course: Pass kite-marked course with a substantial number of level 3 credits at distinction, normally a minimum of 30 with some in Business or Economics. Students should also have GCSE Maths grade B for the BA or A-level Maths Grade B for the BSc.

European Baccalaureate: Pass with 77% overall for BA. Pass with 77% overall including 80% in Maths for BSc.

International Baccalaureate: Pass Diploma with 30 points and 5 in SL maths for BA. Pass with 30 points and 5 in HL Maths for BSc.

Cypriot Apolytirion: 18.5/20 overall including 17 in Maths, plus grade B in 1 A-level. For BSc, additional A-level needs to be in Maths.

French Baccalaureat: 13/20 overall with 13 in Maths for the BA only. Students taking the international option 12/20 overall with 13 in maths for the BA and 13 in Advanced maths for the BSc.

Lithuanian Brandos Atestatas: Pass with grade 8.5 overall, 75% on maths state exam is also required for the BSc.

Chinese first year degree course: Normally, Pass with an average of 85% with good grades in relevant subjects plus mathematics equivalent to A level grade B for BSc.

6. Accreditation of Prior Learning:

Direct entry into the second year may be possible for those with advanced qualifications strictly comparable with our degree structure.

7. Programme aims:

The programme aims to:

- To provide a specialist in-depth education in the application of mathematics and statistics to core areas of economics through progressive training to students with a background in mathematics.
- To prepare students for employment in a wide range of careers such as management, finance and accountancy as well as quantitatively orientated careers in economic research, statistical forecasting and econometrics.
- To develop skills of critical analysis, problem solving, argument and presentation.
- To provide the key skills relevant for further study at a graduate level.
- Provide students following the BSc in Economics with a Year Abroad programme the experience of learning in a different cultural environment.
- To provide students following the BSc Economics with a Year in Industry programme with opportunities to obtain relevant work experience and support them in developing a portfolio to demonstrate learning outcomes. Also to enable these students to learn directly about business and the professional application of their studies.

8. Reference points used to inform the programme specification:

- QAA Framework for Higher Education Qualifications
- QAA Benchmarking statement for Economics: <u>http://www.qaa.ac.uk/en/Publications/Documents/Subject-benchmark-statement-Economics.pdf</u>
- University Employability Strategy
- University of Leicester Periodic Development Review Report (November 2012)
- External Examiners' Reports
- First Destination Survey
- Student feedback (NSS 2016)

9. Programme Outcomes:

Intended Learning Teaching and Learning Learning Learn Demonstrated									
Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?							
(a) Disc	ipline specific knowledge and co	mpetencies							
(i) N	lastery of an appropriate body of kr	nowledge							
Demonstrate knowledge of the main ideas, concepts, models and principles in microeconomic and macroeconomic theory.	Years 1, 2 and 3: Lectures, tutorials, seminars, computer workshops, provision of reading lists and set texts.	Formative assessment: Set exercises and problems, assignments (essays and problems), individual presentations, projects.							
Demonstrate knowledge of the principles of mathematical statistics and their application to economics.		Summative assessment: Exams, research projects.							
Demonstrate knowledge of the application of mathematics to economics.									
(ii) Understar	nding and application of key concep	ts and techniques							
Demonstrate the ability to manipulate economic, mathematical and statistical equations.	Years 1, 2 and 3: Lectures, tutorials, seminars, computer workshops, provision of reading lists and set texts.	Formative: Set exercises and problems, assignments (essays and problems), individual presentations, projects.							
Use a range of statistical and econometric software packages designed for the estimation and hypothesis testing of models and theories in economics. Demonstrate the ability to apply economic/financial/mathematical theories and techniques in a work place setting (Year in Industry variant only).*	Years 2 and 3: Tutorials, computer workshops, provision of reading lists and set texts. Developing the ability to apply economic/financial/mathematical theories and concepts to real world situations within the work environment (Year in Industry variant only).	Summative: Exams, research projects. Reflective log, skills audit, employer feedback and final report/presentation (Year in Industry variant only).							
*The extent to which a student will have the opportunity to do this will vary according to the type of placement.									
	(iii) Critical analysis of key issue								
Analyse, evaluate and interpret statistical information relating to economics. Describe the strengths and weaknesses of quantitative approaches to economic analysis and research.	Years 1, 2 and 3: Lectures, tutorial/classes, seminars, computer practical sessions, provision of reading lists and set texts.	Formative: Set written exercises (essays and problems), and computing exercises, assignments and problems. Summative: Exams, research projects.							
Critically analyse economic arguments and relate them to contemporary economic issues.									
(iv)	Clear and concise presentation of r	naterial							
Clearly arrange and present sets of data relating to economic and statistical concepts.	Years 1, 2 & 3: Lectures, tutorials/classes, computer practical sessions, provision of module outlines, Study Skills Support	Formative: Group and individual computing projects and presentation, essays and assignments.							
Report a research exercise.	material and project guidelines.	Summative: Group and individual research projects.							

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
	al appraisal of evidence with appro	priate insight
Formulate and test concepts and hypotheses. Critically appraise the results from quantitative economic analysis.	Years 1, 2 and 3: Lectures, computing practical sessions, tutorial/classes, provision of reading list and set texts. Years 2 and 3: Lectures,	Formative: Set written and computing exercises and problems, assignments, individual presentations, individual research projects. Summative: Exams, group computing
Plan, conduct and write a computer-based statistical report either directed or on an area chosen by his/herself.	tutorial/classes, computer practical sessions, provision of module outlines, Study Skills Support material and project guidelines.	project and Applied Econometrics Project.
(1	vi) Other discipline specific compete	encies
	•	
	(b) Transferable skills (i) Oral communication	
Oral presentation of economic	Years 1, 2 and 3: Tutorials, seminars	Formative: Presentation of answers to
concepts, arguments and issues and discussion of statistical	& classes.	set exercises and problems in year 1.
work. General presentational skills.	Year 1: Study Skills Programme and Faculty Study Skills Support material.	Summative: Oral presentations with visual aids in year 3.
Application of oral communication skills within the	Years 2 and 3: Training session on presentation skills.	Reflective log and final report/presentation (Year in Industry variant only).
work environment and in presentation (Year in Industry variant only).	Developing oral communication skills in the work environment (Year in Industry variant only).	
	(ii) Written communication	
Produce clear written, graphical and quantitative expressions of general arguments and specific analysis.	Years 1, 2 and 3: Lectures, tutorials, classes and seminars, Study Skills Programme and Study Skills Support material.	Formative: Set exercises & problems, assignments (essays and problems). Summative: Exams, research projects.
Application of written communication skills within the work environment and in report writing (Year in Industry variant only).	Developing written communication skills in the work environment (Year in Industry variant only).	Reflective log and final report/presentation (Year in Industry variant only).
	(iii) Information technology	
Demonstrate use of C & IT in word processing, use of the internet, databases,	Years 1, 2 and 3: Induction/Study Skills Programme, lectures, computer practical sessions/classes.	Formative: Set exercises and problems, assignments/essays, use of WinEcon.
spreadsheets, specialist packages for data collection, problem solving, and presentation of ideas.	Years 2 and 3: Lectures, computer practical sessions/workshops, tutorials/classes.	Summative: Assessed work through computing classes, group and individual research projects.
Demonstrate use of C & IT in processing economic data and in solving economic and statistical problems.	Developing numeracy skills in the work environment through project work (Year in Industry variant only).	Reflective log, skills audit, employer feedback and final report/presentation (Year in Industry variant only).
Application of information technology skills within the work environment and in presentation (Year in Industry variant only).		

Intended Learning	Teaching and Learning	How Demonstrated?
Outcomes	Methods	
Domonstrato numerical	(iv) Numeracy	Formativo: Sot oversizes, problems
Demonstrate numerical, mathematical and statistical skills appropriate outside the field of economics. Application of numeracy skills within the work environment (Year in Industry variant only).	Year 1: Lectures, tutorials, computer workshops. Developing numeracy skills in the work environment through project work (Year in Industry variant only).	Formative: Set exercises, problems and use of computing packages, e.g. WinEcon. Summative: Exams. Reflective log, skills audit, employer feedback and final report/presentation (Year in Industry variant only).
	(v) Team working	
Show the ability to work in	Years 1, 2, and 3: Tutorials,	Formative: Tutorial, classes and
groups both with and without teaching and direct supervision.	seminars, workshops, computing practical sessions.	practical sessions.
Reflective log, skills audit, employer feedback and final	Developing team building skills in the work environment through project	Summative: Group projects and presentations.
report/presentation (Year in Industry variant only).	work (Year in Industry variant only).	Reflective log, skills audit, employer feedback and final report/presentation (Year in Industry variant only).
	(vi) Problem solving	
Demonstrate problem	Years 1, 2, and 3: Lectures, tutorials,	Formative: Set exercises and
recognition, formulation and solution.	seminars, computing practical sessions.	problems, assignments and essays, computing exercises and problems.
Show the ability to recognise problems in unfamiliar settings and apply appropriate methodology.	Developing problem solving skills in the work environment through project work and applying theories and concepts to real world situations (Year in Industry variant only).	Summative: Exams, research projects. Reflective log, skills audit, employer feedback and final report/presentation
Show an appreciation of the importance of abstraction of essential features of complex systems.		(Year in Industry variant only).
Application of problem solving skills within the work environment (Year in Industry variant only).		
	(vii) Information handling	L
Select and apply scientific based methods in the solution of problems.	Lectures, statistics classes, computer-based projects, group projects.	Formative: Statistics classes, tutorials.
Search for information and evaluate its use in a chosen problem.	Tutorials, computer-based projects. Developing data handling in the work	Summative: Research projects. Reflective log, skills audit, employer feedback and final report/presentation
Application of information handling skills within the work environment (Year in Industry variant only).	environment through project work (Year in Industry variant only).	(Year in Industry variant only).

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
	(viii) Skills for lifelong learning	
Demonstrate the capacity to learn in both familiar and unfamiliar situations.	Year 1: Induction/Study Skills Programme and Study Skills Support material.	Formative: Set exercises and problems, assignments and essays, computing exercises, problems and projects, oral presentations and group
Illustrate the ability to absorb and apply new ideas and	Years 1, 2 and 3: Lectures, tutorials, seminars, computer practical	projects.
concepts and the ability to combine them with prior understanding.	sessions, provision of module handouts and reading lists.	Summative: Exams, research projects, presentations on projects.
Show the ability to work in groups and independently.	Developing a variety of employability and transferable skills through responsibilities associated with their work placement (Year in Industry	Reflective log, skills audit, employer feedback and final report/presentation (Year in Industry variant only).
Demonstrate self-organisation, self-motivation and resourcefulness.	variant only).	
Show time management skills through the ability to meet deadlines.		
Demonstrate understanding of the use of various sources of knowledge.		
Demonstrate ability to learn in a different cultural environment (Year Abroad variant only).		
Application of a variety of employability and transferable skills (some outlined already above) within the work environment (Year in Industry variant only).		
Demonstrate the ability to think reflectively about personal and professional development (Year in Industry variant only).		
Demonstrate professional behaviour in the work environment (Year in Industry variant only).		

10. Progression points:

Senate Regulation 5: Regulations governing undergraduate programmes of study:

http://www2.le.ac.uk/offices/sas2/regulations/documents/senatereg5-undergraduates

In order to proceed to the second year of their studies, students must have passed, with a mark of at least 35% (and an overall credit weighted average of 40% during the year), all core modules. It should be noted that no first year students can proceed and resit.

In order to proceed to the third year of their studies, students must have passed, with a mark of at least 35% (and an overall credit weighted average of 40% during the year), all core modules. It should be noted that no second year student can proceed and resit any of the following modules: EC2000, EC2002, EC2024, EC2032.

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course.

Year Abroad variant: Students may only enter this degree programme by transferring after the end of their first-year. The condition for admission to the scheme will be an average mark of no less than 55% in year one. Students who meet these conditions will be invited to apply at the end of their first year of studies, following the Department's June Exam Board. Students will then be expected to maintain average marks of no less than 60% in the first semester of their second year, and that they do not have any failed modules across the second year as a whole. Progression decisions made at the end of semester one should be treated as 'provisional' (as with assessments) and subject to confirmation by the Exam Board in the summer. This will include exceptional cases too.

Year in Industry variant: Students may only enter this variant by transferring at the end of the firstyear. The condition for admission to the scheme will be an average mark of no less than 55% in year one, with no failures. Students who meet these conditions will be invited to apply at the end of their first year of studies, following the Department's June Exam Board.

11. Scheme of assessment:

The programme follows the standard scheme of award and classification set out in Senate Regulation 5.

12. Special features:

- Intended for students who wish to take advantage of their background in mathematics.
- Study of core microeconomic and macroeconomic theory and applications at progressively rising levels of analytical and technical complexity
- Development of learning and communications skills in groups of various sizes.
- A wide range of optional modules allows students to bias their training in a chosen direction.
- Training in, and the use of, information technology and computer skills for statistical and econometric analysis as well as written and oral presentation skills.
- Experience in the design and implementation of statistical project work.
- A formal employability skills development programme in year 1
- The option of a four-year 'with a Year Abroad' degree programme, with a third year spent studying at an overseas partner University either in a foreign language or in English (see below).
- The option of a four-year 'with a Year in Industry' degree programme (see below).

13. Indications of programme quality

- University Academic Review
- External examiners' reports
- First Destination careers statistics
- Exemptions from professional exams (subject to satisfactory completion of certain modules):
- Association of Chartered Certified Accountants (ACCA)
- Chartered Institute of Management Accountants (CIMA)
- Institute of Chartered Accountants
- Chartered Institute of Public Finance & Accountancy (CIPFA)
- Institute of Actuaries
- Chartered Insurance Institute

14. External Examiners:

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports can be found <u>here</u>.

	Semester Total	60

BSc Economics with a Year Abroad

Students may only enter this course by meeting the criteria outlined above in section 10.

FIRST AND SECOND YEAR MODULES

As for the first and second year of BSc Economics.

THIRD YEAR MODULES

1) Students will spend one academic year studying at one of our overseas partner Institutions between the second and final years of their degree programme.

2) During their placement students are expected to undertake modules worth the equivalent of 120 credits at the University of Leicester. For European Institutions this is normally equal to at least 40 ECTS credits, and for Universities elsewhere in the world this is normally equivalent to eight academic modules.

3) Modules selected during the year abroad must be approved by the School of Business and must be in subject areas relevant to a students' degree programme. The selected modules cannot be identical to those that have already been studied, or will be studied upon returning to Leicester for the final year.

4) Students who do not satisfactorily complete their year studying abroad will be transferred to the non-Year Abroad degree path for their final year.

5) Students will have up until the end of the second week of the first term of their third year to transfer to the non-Year Abroad degree voluntarily. After this point students who are not able to complete their year abroad will re-join the non-Year Abroad degree in the following year.

FOURTH YEAR MODULES

As for the third year of BSc Economics.

BSc Economics with a Year in Industry

Students may only enter this course by meeting the criteria outlined above in section 10.

FIRST AND SECOND YEAR MODULES

As for the first and second year of BSc Economics.

THIRD YEAR MODULES

1) Students will work within a sponsoring company for a minimum of 9 months between 1 July of the second year of their course and the start of the following academic year.

2) During their placement students will undertake a programme of training and practical experience which will be agreed by the sponsoring company and the University.

3) During the placement students' progress will be monitored through a variety of activities including the maintenance of a regular log. Students will complete a report and will be expected to make a presentation towards the end of their placement. The report and presentation are requirements for the awarding of the degree but are not part of the formal assessment for the degree.

4) Students who do not satisfactorily complete their industrial placement year will be transferred to the non-Industry degree path.

5) Students will have up until the end of the second week of the first term to transfer to the non-Industry degree voluntarily. After this point students who are not able to complete their year in industry will re-join the non-Industry degree in the following year.

FOURTH YEAR MODULES

As for the third year of BSc Economics.
