The BA in Geography aims to:

- present a contemporary view of the world drawing on the breadth of the many geographical traditions with an emphasis on Human Geography;
- place geography at the core of modern discourses about the world and the events which are taking place in it;
- provide an intellectually challenging and stimulating curriculum that draws on the research expertise of staff in the department and enables students to develop in-depth knowledge and understanding of specialised areas of human geography;
- develop students' awareness of space and the world, and formulate geographical explanations for the phenomena they encounter;
- develop students' abilities to explore varied modes of geographical theories, techniques and concepts to analyse and explain the modern world;
- develop students' abilities to use and apply appropriate field, statistical and social survey methods to analyse issues from a geographical perspective; and
- provide a learning experience in which students can develop and demonstrate a range of transferable skills necessary for effective independent learning; career and personal development.
- provide opportunities to develop employability skills, and career and personal development planning.

The BA in Geography with a Year Abroad aims, additionally, to:

- Widen students' experiences of worldwide Geography, the physical experience of social society and environmental place
- Expose students to specialist elements of Geography that may not be taught at Leicester;
- Deepen students' understanding of Geography through exposure to its ideas at a senior level for an additional year.

The BA in Geography with a Year in Industry aims, additionally, to:

- Provide experience of applications of geography and other professional skills in Industry and to reinforce knowledge through their use in different environments

All of the above, particularly, dissertations, seminars, essays, independent research.

10. Progression points:

A key progression point is the requirement to pass the dissertation proposal for GY2414 before progression to GY3420 can be considered. An opportunity to resit is allowed in July; a further fail at this point will result in a resit without residence, with no immediate progression to Year 3. Further failure will trigger a withdrawal from the course.

For Year in Industry Variant:

Progression onto the Year in Industry placement preparation module will require a 1st year CWA of 50%. Students who undertake the placement preparation module, but do not obtain a placement or do not satisfactorily complete (attendance, participation and completion of set tasks) the placement year will be transferred to the standard degree programme.

11. Scheme of Assessment

The programme follows the standard scheme of award and classification set out in Senate Regulation 5.

12. Special features:

Study in the field remains an integral part of the geography curriculum and the department runs field courses to a number of destinations around the world. Staff are engaged in internationally recognised research in the three principal areas of geography: Human Geography, Physical Geography, and Earth Observation and Geographical Information Science, specialising in Environment and Social Justice, Everyday Geopolitical lives, Planetary Urban and Rural Transformations, forests and Peatlands and Environmental Processes and Change.

Placements

Students undertake a year in industry between the second and third years of their programme. Progression onto the Year in Industry placement preparation module will require a 1st year CWA of 50%. Students who undertake the placement preparation module, but do not obtain a placement or do not satisfactorily complete (attendance, participation and completion of set tasks) the placement year will be transferred to the standard degree programme.

As a condition of the 'with Industry' programme, students are required to undertake preparatory training during the second year of their degree.

Students are responsible for securing their own placement but will receive support in this from the Career Development Service. .

Once in placement, students will need to register their University 'attendance' by logging on to a dedicated Blackboard site once a week. In the course of the placement the student will receive one or two visits from a member of staff. The second 'visit' can be in the form of a Skype call. Should a student secure an overseas placement both visits will typically be delivered via a Skype call.

While in placement, students will be required to complete an online log. The placement log requires students to undertake reflective activities which are marked on a pass/fail basis. This, together with the final summative reflective report, constitutes the assessment for the placement year. Students have to submit the final report within one month of finishing the placement, and are allowed to resubmit once if required.

If a student fails to secure a placement or does not meet the academic progression requirements at the end of year 2, they will be transferred to the non-industry variant of their degree programme.

13. Indications of programme quality

External Examiner's reports have repeatedly praised the breadth of the education, the range of assessment types and the dedication of the staff.

14. External Examiners

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports can be found here.
