

Programme Specification (Undergraduate) For students entering in 2019/20

Date amended: April 2018

1. Programme Title(s) and UCAS code(s):

BA (Hons) Geography L700
BA (Hons) Geography with a year abroad*
BA Geography with a Year in Industry*

* Selected when on course

2. Awarding body or institution:

University of Leicester

3. a) Mode of study:

Full time

b) Type of study:

Campus-based

4. Registration periods:

BA (Hons) Geography (L700)

The normal period of registration is three years

The maximum period of registration is five years BA (Hons) Geography with a year abroad

BA (Hons) Geography with a year abroad* and BA (Hons) Geography with a Year in Industry The normal period of registration is four years

The maximum period of registration is six years

5. Typical entry requirements:

ABB A level. Any three A levels usually required; Geography is not required. Two AS levels can be considered in place of one A level towards the total. General Studies accepted. BBB + EPQ at grade B, two AS-levels considered in place of one A-level. General Studies accepted. Key Skills also welcome.

International Baccalaureate: Pass Diploma with 32 points

6. Accreditation of Prior Learning:

APL will not be accepted for exemptions from individual modules, however it may be considered for direct entry to year 2, on a case by case and subject to the general provisions of the University APL policy.

7. Programme aims:

The BA in Geography aims to:

- present a contemporary view of the world drawing on the breadth of the many geographical traditions with an emphasis on Human Geography;
- place geography at the core of modern discourses about the world and the events which are taking place in it;
- provide an intellectually challenging and stimulating curriculum that draws on the research expertise of staff in the department and enables students to develop in-depth knowledge and understanding of specialised areas of human geography;
- develop students' awareness of space and the world, and formulate geographical explanations for the phenomena they encounter;
- develop students' abilities to explore varied modes of geographical theories, techniques and concepts to analyse and explain the modern world;
- develop students' abilities to use and apply appropriate field, statistical and social survey methods to analyse issues from a geographical perspective; and
- provide a learning experience in which students can develop and demonstrate a range of transferable skills necessary for effective independent learning; career and personal development.
- provide opportunities to develop employability skills, and career and personal development planning.

The BA in Geography with a Year Abroad aims, additionally, to:

- Widen students' experiences of worldwide Geography, the physical experience of social society and environmental place
- Expose students to specialist elements of Geography that may not be taught at Leicester;
- Deepen students' understanding of Geography through exposure to its ideas at a senior level for an additional year.

The BA in Geography with a Year in Industry aims, additionally, to:

• Provide experience of applications of geography and other professional skills in Industry and to reinforce knowledge through their use in different environments

8. Reference points used to inform the programme specifications

- QAA Frameworks for Higher Education Qualifications in England Wales and Northern Ireland
- QAA Benchmark statement for Geography 2014
- PDR report (May2015)
- University Learning Strategy
- University Employability Strategy
- NSS (2016)
- First Destination Survey
- External Examiner's Reports

9. Programme Outcomes:

Intended Learning	Teaching and Learning	How Demonstrated?
Outcomes	Methods	
(a) Disc	ipline specific knowledge and co	mpetencies
(i) N	lastery of an appropriate body of kr	-
Demonstrate an appropriate body of	Lectures, tutorials, seminars, computer-aided learning and	Essays, essay-based examinations, dissertations, presentations,
geographical knowledge including patterns and	computer-based practical, laboratory based practical, directed	contributions to discussion, practical reports, objective testing, problem-
processes of environmental systems and cycles,	readings, independent research, student centered learning,	based exercises, field & lab notebooks, review papers,
environmental change and human and environmental	presentations and discussion.	bibliographies
interactions.	l Inding and application of key concep	ts and techniques
Demonstrate knowledge of the	Lectures, tutorials, seminars,	Essays, essay-based examinations,
different approaches to geographical explanation and interpretation.	directed reading, independent research, computer practical, group learning.	dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
Demonstrate a competence in the varied methods of	Tutorials, seminars, directed reading, independent research,	
interpreting the physical	computer practical; laboratory	
environment.	based practical, group learning.	
Recognise the ways in which physical, environmental, and	Lectures, tutorials, seminars, directed reading, independent research,	
cultural processes lead to the	computer practicals, group learning.	
distinctiveness of places.		
	(iii) Critical analysis of key issue	
Critical evaluation of the	Lectures, tutorials, seminars,	Essays, essay-based examinations,
theoretical, philosophical and methodological perspectives employed in physical geography; geography's role in	directed reading, independent research, computer practicals, group learning.	dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
inter- disciplinary studies within natural and social sciences; and the role of physical geography in contemporary society.		
Awareness of advantages and problems of varied geographical methods of analysis.	Tutorials, seminars, directed reading, independent research, computer practicals, group learning	
Critical reflection on research observations presented in the	Tutorials, seminars, directed reading, independent research,	
literature and own empirical research.	computer practicals, group learning	
(iv)	Clear and concise presentation of r	material
Use a variety of geographical	Tutorials, seminars, independent	Writing tasks, design, mapping and
and general methods to present	research, computer practicals, group	visualization tasks (e.g. posters,
information to a range of different audiences.	learning.	magazines), contributions to discussion, dissertations
uniterent audiences.		(presentation of independent
		research), presentation skills.

(v) Critical appraisal of evidence with appropriate insight Formulate appropriate questions for geographical inquiry, and gather and utilise suitable evidence in answering them. Read, analyse and reflect critically and contextually on geographical research from problem formulation to evidence collection, result presentation and discussion. Use specialised techniques and approaches for the collection, interpretation of geographical information. Use specialised techniques and approaches for the presentation of geographical information. Seminars, tutorials, field courses. (ii) Oral communication Demonstrate clear, fluent and coherent oral expressions of geographical reguraphical issues. (iii) Information technology use information. Seminars, tutorials, field courses. (iii) Information technology use information. Computer practical classes, group and independent research. Field courses. Dissertations; group and independent research. Field reports, group and independent research; dissertations; tutorials; objective testing; laboratory reports. aboratory practicals, lectures. Dissertations; group and independent research. Field reports, group and independent research; dissertations; tutorials, objective testing; laboratory reports. aboratory practicals, lectures. (ib) Transferable skills (i) Oral communication Seminars, tutorials, field courses. Seminars, tutorials, field courses. Seminars, tutorials, field courses. (iii) Information technology use information technology in general, and geographical information, systems in particular to explore and analyse geographical concepts and information, explore and analyse geographical concepts and information technology in general, and geographical analyse geographical concepts and information, explore and analyse geographical studies, including the use of it for bibliographic research, and written and visual	Intended Learning	Teaching and Learning	How Demonstrated?

	(iv) Numeracy	
Use statistical and graphic techniques to explore, analyse and visualise geographical concepts.	Lectures; computer practical classes, independent research	Computer-based exercises. Independent research, dissertation,
	(v) Team working	
Work effectively and collaboratively in teams to collectively explore geographical concepts and tasks.	Tutorials, seminars, team problem solving, field courses.	Seminar and tutorial working, problem solving exercises.
tasks.	(vi) Problem solving	
Explore geographical problem spaces with contemporary discourses and approaches	Tutorials, seminars, team problem solving, field courses.	Computer-based exercises. Independent research, dissertation, problem solving exercises.
discourses and approaches	(vii) Information handling	problem solving exercises.
Gather, retrieve and manipulate geographical evidence and information in support of geographical arguments	Tutorials, seminars, directed reading, independent research, computer practicals, team problem solving, field courses.	Essays, essay-based examinations, dissertations, practical reports., seminar and tutorial working, problem solving exercises, team problem solving
Analyse information from a variety of sources to develop and construct geographical arguments and interpretations.	Tutorials, seminars, directed reading, independent research, computer practicals, team problem solving, field courses.	
	(viii) Skills for lifelong learning	
Demonstrate intellectual development and independence through the setting of research tasks and the solving of geographical problems.	All of the above particularly, independent research and seminar presentations	All of the above, particularly, dissertations, seminars, essays, independent research.
Reflect upon own learning and use personal development planning to plan personal, academic and career development.	All of the above, particularly tutorials, Personal and Development Planning	Discussions with personal and other tutors; Curriculum vitae writing. Employability & career development module.
Manage time effectively to meet targets and deadlines.	All of the above, particularly independent research and self-directed study.	All of the above, particularly, dissertations, seminars, essays, independent research.

10. Progression points:

A key progression point is the requirement to pass the dissertation proposal for GY2414 before progression to GY3420 can be considered. An opportunity to resit is allowed in July; a further fail at this point will result in a resit without residence, with no immediate progression to Year 3. Further failure will trigger a withdrawal from the course.

For Year in Industry Variant:

Progression onto the Year in Industry placement preparation module will require a 1st year CWA of 50%. Students who undertake the placement preparation module, but do not obtain a placement or do not satisfactorily complete (attendance, participation and completion of set tasks) the placement year will be transferred to the standard degree programme.

11. Scheme of Assessment

The programme follows the standard scheme of award and classification set out in <u>Senate Regulation</u> 5.

12. Special features:

Study in the field remains an integral part of the geography curriculum and the department runs field courses to a number of destinations around the world. Staff are engaged in internationally recognised research in the three principal areas of geography: Human Geography, Physical Geography, and Earth Observation and Geographical Information Science, specialising in Environment and Social Justice, Everyday Geopolitical lives, Planetary Urban and Rural Transformations, forests and Peatlands and Environmental Processes and Change.

Placements

Students undertake a year in industry between the second and third years of their programme. Progression onto the Year in Industry placement preparation module will require a 1st year CWA of 50%. Students who undertake the placement preparation module, but do not obtain a placement or do not satisfactorily complete (attendance, participation and completion of set tasks) the placement year will be transferred to the standard degree programme.

As a condition of the 'with Industry' programme, students are required to undertake preparatory training during the second year of their degree.

Students are responsible for securing their own placement but will receive support in this from the Career Development Service. .

Once in placement, students will need to register their University 'attendance' by logging on to a dedicated Blackboard site once a week. In the course of the placement the student will receive one or two visits from a member of staff. The second 'visit' can be in the form of a Skype call. Should a student secure an overseas placement both visits will typically be delivered via a Skype call.

While in placement, students will be required to complete an online log. The placement log requires students to undertake reflective activities which are marked on a pass/fail basis. This, together with the final summative reflective report, constitutes the assessment for the placement year. Students have to submit the final report within one month of finishing the placement, and are allowed to resubmit once if required.

If a student fails to secure a placement or does not meet the academic progression requirements at the end of year 2, they will be transferred to the non-industry variant of their degree programme.

13. Indications of programme quality

External Examiner's reports have repeatedly praised the breadth of the education, the range of assessment types and the dedication of the staff.

14. External Examiners

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports can be found <u>here</u>.

Appendix 1: Programme structure (Programme regulations)

FIRST YEAR MODULES		
	SEMESTER 1	
Core Modules		Credits
GY1411	HUMAN GEOGRAPHY FOR A GLOBALIZED WORLD	15
GY1423	EXPLORING OUR DIGITAL PLANET	15
GY1422	INTRODUCING LEICESTER GEOGRAPHIES	15
GY1431	EVOLUTION OF THE EARTH SYSTEM	15
	Semester Total	60
	SEMESTER 2	
Core Modules		Credits
GY1412	ENVIRONMENT/NATURE/SOCIETY	15
GY1413	HUMAN GEOGRAPHY FIELDCOURSE: THE DYNAMICS OF PEOPLE AND PLACE	15
GY1421	WORKING WITH GEOGRAPHICAL INFORMATION	15
GY1432	LANDSCAPE-ECOSYSTEM DYNAMICS	15
	Semester Total	60
SECOND YEAR MODULES		
	SEMESTER 1	
Core Modules		Credits
GY2410	HISTORIES AND PHILOSOPHIES OF HUMAN GEOGRAPHY	15
Optional Modules		
45 CREDITS OF APPROVE	D OPTIONAL MODULES SELECTED FROM	
GY2411	A CRITICAL GEOGRAPHY OF ENVIRONMENT AND DEVELOPMENT	15
GY2413	SOCIAL AND CULTURAL GEOGRAPHY	15
GY2412	ECONOMY, SOCIETY AND SPACE	15
GY2434	THE DYNAMIC BIOSPHERE	15
	Semester Total	60
	SEMESTER 2	
Core Modules		Credits
GY2414	RESEARCH DESIGN AND METHODS (WITH DISSERTATION PLANNING)*	15
GY2415	GEOGRAPHICAL RESEARCH IN THE FIELD (OVERSEAS FIELD COURSE)	15
Optional Modules		
20 CDEDITE OF ADDDOVE	O OPTIONAL MODULES SELECTED FROM:	
30 CREDITS OF APPROVE		
GY2416	POLITICAL GEOGRAPHY: SPACE, TERRITORY AND POWER	15
	POLITICAL GEOGRAPHY: SPACE, TERRITORY AND POWER GEOGRAPHICAL INFORMATION SCIENCE	15 15
GY2416		
GY2416 GY2421	GEOGRAPHICAL INFORMATION SCIENCE	15

THIRD YEAR MODULES

SEMESTER 1

Core Modules		Credits
GY3420	GEOGRAPHY DISSERTATION	30
Optional Modules	ED OPTIONAL MODULES SELECTED FROM	
30 CREDITS OF APPROV	ED OPTIONAL MODULES SELECTED FROM	
GY3411	CONTEMPORARY ENVIRONMENTAL CHALLENGES	15
GY3413	GEOGRAPHIES OF THE MARKET-PLACE	15
GY3414	CRITICAL GEOPOLITICS	15
GY3425	CRITICAL DIGITAL GEOGRAPHIES	15
GY3428	CRITICAL GEOGRAPHIES OF AMERICAN CULTURAL LANDSCAPES	15
GY3431	NEOTROPICAL RAINFORESTS ^a	15
	Semester Total	60

SEMESTER 2

Optional Modules

60 CREDITS OF APPROVED OPTIONAL MODULES SELECTED FROM:

GY3415	MIGRATION, PLACE AND DIVERSITY		15
GY3412	CITIES OF THE GLOBAL SOUTH		15
GY3417	CRITICAL, SYMBOLIC AND EMOTIONAL RURAL GEOGRAPHIES		15
GY3418	BERLIN FIELD COURSE: TRACING GEOPOLITICS IN URBAN SPAC	E	15
GY3421	INFORMATION VISUALISATION		15
GY3426	DISSERTATION: PREPARING FOR PUBLICATION		15
GY3439	UNDERSTANDING THE TROPICAL FORESTS OF SE ASIA		15
	:	Semester Total	60

a - on BA programmes, GY3431 has prerequisite of GY2434

BA GEOGRAPHY WITH A YEAR ABROAD

Approved institutions for Geography include those listed at http://www2.le.ac.uk/offices/international/overseas-exchange/outgoing/where-can-I-go/exchanges-by-academic-subject/geography.

FIRST, SECOND AND FOURTH YEAR MODULES

Regulations for the first and second year are the same as for the BA degree in Geography. Regulations for the fourth year of the course are the same as for the third year of the BA degree in Geography.

THIRD YEAR MODULES

The third year will be spent abroad in the USA, Canada, Finland, Spain, Germany and the Netherlands taking approved courses in one of the institutions associated with the Department of Geography. Level 3 modules from the Geography and Environmental Sciences Departments of the host Institution, plus introductory language modules, to the same overall credit value per year as Leicester. A small proportion of modules in other subjects may be taken by prior agreement of the International Officer in the Department of Geography, University of Leicester. Students will be required to reach a prescribed level of attainment in the work done abroad (a pass in Leicester terms according to the mark translation). Any student failing the year abroad component will revert back to the standard Leicester variant of their degree."
