11. Scheme of Assessment

Undergraduate scheme of assessment, follows the standard scheme of award and classification set out in [Senate Regulation 5](#).

12. Special features

The School of History, Politics and International Relations includes historians who range from the medieval era to the twenty-first century, with specialisms in British, European, American and global history. In REF 2021, History at Leicester was ranked 2nd in the UK for its research out of 81 History departments, and it achieves excellent results in the NSS for the quality of its teaching.

The student's learning experience is enhanced by the School's strong commitment to developing synergy between its research and teaching activities, as, for instance, in its active participation in the East Midlands Centre for History Teaching and Learning. The BA History programme combines a strong structure of core modules with optionality at all levels of the curriculum; this stretches students intellectually while also allowing them to follow particular historical interests and their intellectual curiosity, maximising their active engagement with their learning from the very beginning of their degree. The diversity of assessment methods used

allows students to demonstrate abilities in a variety of formats, as well as equipping students with a range of IT, communication, and other transferable skills to an advanced level.

For the Year in Industry variant, [the additional Special Features apply](#)

12a. Research-inspired Education

Students on this programme will advance through the four quadrants of the University of Leicester Research-inspired Education Framework as follows:

RiE Quadrant	Narrative
Research-briefed Bringing staff research content into the curriculum.	• Research briefed: Staff research is integrated into the curriculum across all three years of the programme. In year one, survey modules are team taught so that students are introduced to the full range of specialisms from across the department. Year one's People and Places module centres on in-depth microhistories closely related to staff research. In the core year two module HS2401 Perceiving the Past, tutors introduce different historical approaches by exploring how they apply to their own field of research. Year two and year three option modules bring staff specialisms into the classroom. The final year dissertation enables students to draw on the expert advice of a supervisor in their field.
Research-based Framed enquiry for exploring existing knowledge.	• Research-based. The year one core module HS1111/HS1000 Making History involves a framed enquiry into current research in a specific field (Bibliographic Exercise), and year two's HS2401 Perceiving the Past embeds a research activity on a case of debated heritage (Contested Heritage Panel). In HS2500 Becoming the Historical Researcher students begin to frame their own dissertation research project, preparing the ground for the year three dissertation by exploring existing knowledge.
Research-oriented Students critique published research content and process.	• Research-oriented. All History modules involve close engagement and assessment of published scholarship. This is a key element of essays, but it is also practiced through a group podcast on a major historical debate (HS1016 Europe), through article critiques, and through seminar discussions of articles or books. Once again, this culminates in the final year dissertation, where students assess, critique and advance beyond current scholarship.
Research-apprenticed Experiencing the research process and methods; building new knowledge.	• Research-apprenticed. The History programme is designed to prepare students to produce their own historical research in the final year dissertation. We begin in year one with an Online Research and Reflection Activity in HS1111/HS1000 and with close study of primary sources in tutorials and on HS1100 People and Places. On HS2500 Becoming a Historical Researcher, students develop a Research Project Proposal in discussion with an academic expert. In year three Special Subjects, three-hour classes involve intensive scrutiny of primary sources with related assignments: a Source-based Analysis and a Document Test. Finally, the 10,000-word research dissertation in year three marks the culmination of the programme, when students (with guidance from a specialist supervisor) become independent researchers in their own right.

As part of studying at a research-intensive university, students on this programme have the following extra or co-curricular opportunities available to them to gain exposure to research culture:

The School has a rich culture of extra-curricular research seminars and public lectures, organised by the Centre for Urban History, the Centre for Local and Regional History, the Stanley Burton Centre for Holocaust and Genocide Studies, and the Leicester Medieval Research Centre. These events bring distinguished researchers to campus, and undergraduate as well as postgraduate students are welcome to participate.

Teaching on this programme will be research-informed (it draws consciously on systematic inquiry into the teaching and learning process itself) in the following way:

The School supports all staff involved in teaching to gain an accredited Higher Education teaching qualification, in which they demonstrate their use of teaching theory to support their own practice and reflect on their current teaching and continuing professional development. The School holds an annual Teaching Away Day as well as termly teaching meetings for the History team to develop ideas around best practice. These events allow for in-depth discussion of teaching, including the interface with research and how we support students to become research-briefed, research-based, research-oriented and research-apprenticed.

13. Indications of programme quality

The programme has been consistently praised by external examiners for its geographical and chronological breadth.

14. External Examiner(s) reports

BA History with Year Abroad

The above four-year degree is also available. Students may only enter the four-year variant of the relevant three-year programme by transferring at the end of the first or second-year and on the recommendation of the heads of the divisions concerned. Transfer is conditional on successful completion of first and second-year modules. The programme structure is as for first, second and final year modules for the three-year programme (above). The third year is spent abroad at an approved partner institution. In order to proceed to the fourth year of the course students must pass their year abroad. The year abroad does not otherwise count towards the final classification of the degree.

The programme is assessed as a Four Year Programme with a year out, with the year abroad treated as the 'year out'. The year out does not count towards the final classification, but a student must pass all modules taken during the year abroad to proceed to the final year of the programme. The second and fourth years are used in determining the degree class, according to the standard scheme for three-year programmes.

Degrees will be classified using the same scheme as for three-year programmes.

To take part in the Year Abroad programme students must pass all modules in years 1 and 2, and achieve a credit weighted average of 55% in year 2 (They may also be required to learn the language of the destination country, providing the Office with a language certificate as evidence of satisfactory completion of training through the 'Languages at Leicester scheme' or an appropriate alternative. Failure to meet these criteria will lead to the School recommending transfer to the 3-year degree which the student would otherwise have taken.
