Year Abroad: Specific [‘with a Year abroad’ programme outcomes](#) also apply for ‘with a Year Abroad’ variants

Year in Industry: Specific [‘Year in Industry’ programme outcomes](#) also apply for ‘Year in Industry’ variants

## 10. Progression points

This programme follows the standard Scheme of Progression set out in [Senate Regulations](#) – see the version of Senate Regulation 5 governing undergraduate programmes relevant to the year of entry.

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course.

### a) Course transfers

Transfers from BA Journalism to other subjects will be permitted, subject to the agreement of the receiving subjects. Transfers into the BA Journalism will only be permitted into the first year, due to the incremental and skills-building nature of the programme. To permit transfers into the second and third years would be detrimental to the academic success of students wishing to transfer.

### b) Year abroad

For the Year Abroad variant (for experiential Year Abroad only) [the additional progression points apply](#)

### c) Year in Industry

For the Year in Industry variant, the [additional progression points apply](#)

## 11. Criteria for award and classification

This programme follows the standard scheme of undergraduate award and classification set out in [Senate Regulations](#) – see the version of *Senate Regulation 5 governing undergraduate programmes* relevant to the year of entry.

## 12. Special features

Employability is embedded into the programmes through the provision of modules JO1004 Journalism Employability in the first year, which encourages and facilitates the development of student skills and attributes which will help the student make themselves more employable on graduation. Field research, guest author and industry professional talks, training in performance, connection to the Centre for New Writing events, are all established employability features of the Creative Writing side of the programme.

Students will be introduced to a range of assessment techniques including creative work across the forms and genres, critical reflective commentaries, and group projects. Assessment techniques used in first year will be developed and deepened in second year, and a range of strategies will be used, including formative writing assignments, seminar presentations, and peer review workshops. In the final year, students will choose from one of the options available in Journalism and one in Creative Writing (where timetabling considerations permit)

Assessment will include, as well as creative work, oral presentations and reflective commentaries. From their first year, students will develop skills in a variety of forms and genres. Across the course, they will examine and practise a variety of methodological approaches to study and be given the opportunity to explore different aspects of literary genre and creative practice and knowledge of the journalism and creative writing industries. Students studying Journalism WITH Creative Writing will still be able to study the most important Journalism modules. In the first year they will study the two key

areas of journalistic skills in JO1000 and 1003, while also gaining key contextual knowledge from JO1001, 1002. The Creative Writing pathway is designed for students to move from an introductory study of key forms and genres (in year 1), to a trans-generic, thematised approach, which emphasises research and creative skills (in year 2), to specialization and optionality (in year 3).

In the first year of Creative Writing, students study EN1025 and EN1035 Introduction to Writing Creatively, which provide an introductory background to key forms, including Creative Non-Fiction, Poetry, Short Fiction and Screenwriting.

Two non-credit but very important modules, Introduction to Academic Skills and Journalism Employability will also be studied to help equip students for their journeys through higher education and into employment. To study two non-credit modules in the first year is unusual, but it is felt both these modules provide core and key skills for students which cannot be incorporated in the subject-specific credit-bearing modules and cannot be delayed until the second year. Undergraduate students can struggle to adjust to academic expectations at BA level, so the study skills module is essential to develop this capability. Employability is such a key aspect of this programme that it must be addressed in the first year so it can be built upon in subsequent years.

If these two modules must be studied, the rationale is that it is best to study them in the first year when the additional time taken will not impact on final degree work. Indeed the primary commitment in both modules is attendance rather than assessment. An incentive for the students will be to include completion of the modules on the student transcripts if they pass the modules.

In the second year they will study Multi-Media and Entrepreneurial Journalism as well as having an introduction to Broadcast Journalism. They will also learn about the context of Journalism in MS2010 and prepare for the major piece of third year work, the Journalism Dissertation, by studying Media research methods. In Creative Writing in the first semester of the second year, students will take EN2070 Using Stories. This module uses key themes to explore some of the ways in which writers can discover, recover and explore materials, ideas and narratives in the wider world, and use and reshape them into effective creative pieces. It encourages students to develop their Creative Writing research methods, and then to employ those methods in the construction of original writing, in multiple genres. In this way, it aims to enhance both the students' research and writing skills. In the second semester of the second year, students take EN2080, which aims to combine an intensive creative writing workshop with practice in performing work, and advanced study of creative writing research methods, critical reflection, and writing literary reviews for publication.

In the third year students will do both a major practical piece of work in their Publishing Project modules, which is likely to be the creation of a magazine or a website, and conduct a major academic investigation, in their Journalism Dissertation. They will also choose two optional Journalism or Media modules. In their final year in Creative Writing, students can choose from a number of optional modules including fiction, screenwriting, writing for voices, comedy writing, poetry and so on.

Academic years do not stand alone. Each academic year builds on the skills and understanding built up at the previous level.

For the Year Abroad variant (for experiential Year Abroad only) [the additional Special Features apply](#)

For the Year in Industry variant. The University recognises that undertaking a work placement as part the programme of study can enhance career prospects and provide added value, and as such this programme includes a 'year in industry' variant.

By experiencing real-world scenarios and applying skills and knowledge to a professional environment, students can gain a unique insight into how their studies can be utilised in industry. This will not only showcase their abilities to future employers but will also enhance their studies upon returning to university to complete your programme.

To understand the special features for year in industry undergraduate programme variants, this programme specification should be read in conjunction with the [programme specification content which can be found here](#). This outlines details including programme aims, support, progression and duration.

## 12a. Research-inspired Education

**Students on this programme will advance through the four quadrants of the University of Leicester Research-inspired Education Framework as follows:**

RIE Quadrant	Narrative
<b>Research-briefed</b> Bringing staff research content into the curriculum.	<b>Research-briefed</b> The journalism programme is taught by people who have been and still are working journalists. They bring many years of experience from all forms of journalism, including, newspapers, magazines, radio, television and social media production into the classroom. Apart from this professional practical knowledge, staff use their own specialist research in areas, such as politics, environment, media convergence and artificial intelligence, to inform their teaching.
<b>Research-based</b> Framed enquiry for exploring existing knowledge.	<b>Research-based</b> Journalism is seen as a practical course, where concepts and skills are introduced and practiced from the moment students join. This allows them to explore the existing knowledge and approaches to content production and develop their own skills. This is achieved through regular writing and researching assignments and is embedded in all core modules.
<b>Research-oriented</b> Students critique published research content and process.	<b>Research-oriented</b> A unique design of the journalism programme at Leicester is the way practical skills are interwoven with academic approaches to understanding the subject. Students will use their academic knowledge to interrogate concepts and explain processes. This may mean critically assessing radio programmes or concepts such as ethical journalism or objectivity.
<b>Research-apprenticed</b> Experiencing the research process and methods; building new knowledge.	<b>Research-apprenticed</b> The final year dissertation allows students to bring all their understanding to bear on their own research project. It requires an academic approach and tests their skills, from organisation, through research, to creating new knowledge. As part of the other core modules in the final year students work individually and in groups to create their own news website. The content needs to be researched and created by them individually and this process combines all four of the Research-inspired Education quadrants. They use the knowledge they have acquired, with support of staff and their cohort to deliver the content and a presentation. They then produce a critical self-reflective account of the process with relevant academic literature to support their choices.

	Other optional modules such as Investigative Journalism, Sports Journalism, and Political Journalism all require application of knowledge developed during study and original research to produce content both in class and for assignments. Students are led in all of these modules by staff who have worked as journalists across all media platforms for many years. The modules are predicated on a research brief, they are practical in nature allowing research-based teaching and research orientated practical elements.

**As part of studying at a research-intensive university, students on this programme have the following extra or co-curricular opportunities available to them to gain exposure to research culture:**

The Journalism programme at the University of Leicester weaves practical and academic elements together across three years. As part of the programme students have the opportunity to meet journalists from all different forms of the industry. They can also select a placement module in the third year which gives them the opportunity to work in a real-world environment. Students are encouraged to get involved in student media where their work can be published/broadcast.

**Teaching on this programme will be research-informed (it draws consciously on systematic inquiry into the teaching and learning process itself) in the following way:**

The School supports all staff involved in teaching to gain an accredited Higher Education teaching qualification, in which they demonstrate their use of teaching theory to support their own practice and reflect on their current teaching and continuing professional development

Firstly, the course is taught by former and working journalists who embed their professional practical knowledge into core and optional modules. All members of staff engage in areas of research, these currently include, politics, television, environment, sport, media convergence and artificial intelligence. Secondly, all lecturers have attained at least fellowship status of Advance HE, which recognises standards of teaching and learning support in higher education. Thirdly, staff are members of the Association of Journalism Educators and regularly attended, engage and present at these educational conferences.
