10. Progression points

This programme follows the standard Scheme of Progression set out in [Senate Regulations](#) – see the version of Senate Regulation 5 governing undergraduate programmes relevant to the year of entry.

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course.

a) Course transfers

Transfer onto the start of any programme will be considered by the programme director within the university-set two week period at the start of the first year.

Transfer between Journalism programmes (for example joint to single honours) may be allowed at the end of the first year subject to the discretion of the Journalism programme director.

Direct transfer into the second or third year on any Journalism programme will not normally be allowed.

b) Year abroad

For the Year Abroad variant (for experiential Year Abroad only) [the additional progression points apply](#)

c) Year in Industry

For the Year in Industry variant, the [additional progression points apply](#)

11. Criteria for award and classification

This programme follows the standard scheme of undergraduate award and classification set out in [Senate Regulations](#) – see the version of *Senate Regulation 5 governing undergraduate programmes* relevant to the year of entry.

12. Special features

For the Year Abroad variant (for experiential Year Abroad only) [the additional Special Features apply](#)

For the Year in Industry variant. The University recognises that undertaking a work placement as part the programme of study can enhance career prospects and provide added value, and as such this programme includes a 'year in industry' variant.

By experiencing real-world scenarios and applying skills and knowledge to a professional environment, students can gain a unique insight into how their studies can be utilised in industry. This will not only showcase their abilities to future employers but will also enhance their studies upon returning to university to complete your programme.

To understand the special features for year in industry undergraduate programme variants, this programme specification should be read in conjunction with the [programme specification content which can be found here](#). This outlines details including programme aims, support, progression and duration.

12a. Research-inspired Education

Students on this programme will advance through the four quadrants of the University of Leicester Research-inspired Education Framework as follows:

RiE Quadrant	Narrative
<p>Research-briefed</p> <p>Bringing staff research content into the curriculum.</p>	<p>Research-briefed</p> <p>The journalism programme is taught by people who have been and still are working journalists. They bring many years of experience from all forms of journalism, including, newspapers, magazines, radio, television and social media production into the classroom. Apart from this professional practical knowledge, staff use their own specialist research in areas, such as politics, environment, media convergence and artificial intelligence, to inform their teaching.</p>
<p>Research-based</p> <p>Framed enquiry for exploring existing knowledge.</p>	<p>Research-based</p> <p>Journalism is seen as a practical course, where concepts and skills are introduced and practiced from the moment students join. This allows them to explore the existing knowledge and approaches to content production and develop their own skills. This is achieved through regular writing and researching assignments and is embedded in all core modules.</p>
<p>Research-oriented</p> <p>Students critique published research content and process.</p>	<p>Research-oriented</p> <p>A unique design of the journalism programme at Leicester is the way practical skills are interwoven with academic approaches to understanding the subject. Students will use their academic knowledge to interrogate concepts and explain processes. This may mean critically assessing radio programmes or concepts such as ethical journalism or objectivity.</p>
<p>Research-apprenticed</p> <p>Experiencing the research process and methods; building new knowledge.</p>	<p>Research-apprenticed</p> <p>The final year dissertation allows students to bring all their understanding to bear on their own research project. It requires an academic approach and tests their skills, from organisation, through research, to creating new knowledge. As part of the other core modules in the final year students work individually and in groups to create their own news website. The content needs to be researched and created by them individually and this process combines all four of the RiE quadrants. They use the knowledge they have acquired, with support of staff and their cohort to deliver the content and a presentation. They then produce a critical self-reflective account of the process with relevant academic literature to support their choices.</p> <p>Other year three optional modules all require application of knowledge developed during study and original research to produce content both in class and for assignments. Students are led in all of these modules by staff who have worked as journalists across all media platforms for many years. The modules are predicated on a research brief, they are practical in nature allowing research-based teaching and research orientated practical elements.</p>

As part of studying at a research-intensive university, students on this programme have the following extra or co-curricular opportunities available to them to gain exposure to research culture:

The Journalism programme at the University of Leicester weaves practical and academic elements together across three years. As part of the programme students have the opportunity to meet journalists from all different forms of the industry. They can also select a placement module in the third year which gives them the opportunity to work in a real-world environment. Students are encouraged to get involved in student media where their work can be published/broadcast.

Teaching on this programme will be research-informed (it draws consciously on systematic inquiry into the teaching and learning process itself) in the following way:

The School supports all staff involved in teaching to gain an accredited Higher Education teaching qualification, in which they demonstrate their use of teaching theory to support their own practice and reflect on their current teaching and continuing professional development.

Firstly, the course is taught by former and working journalists who embed their professional practical knowledge into core and optional modules. All members of staff engage in areas of research, these currently include, politics, television, environment, sport, media convergence and artificial intelligence. Secondly, all lecturers have attained at least fellowship status of Advance HE, which recognises standards of teaching and learning support in higher education. Thirdly, staff are members of the Association of Journalism Educators and regularly attend, engage and present at these educational conferences.

13. Indications of programme quality

Student achievement, NSS scores, external examiner reports, periodic review reports, graduate employment and destinations.

14. External Examiner(s) reports

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports for this programme can be found at exampapers@Leicester [log-in required].
