12. Special features

For the Year in Industry variant, [the additional Special Features apply](#)

12a. Research-inspired Education

Students on this programme will advance through the four quadrants of the University of Leicester Research-inspired Education Framework as follows:

RiE Quadrant	Narrative
Research-briefed Bringing staff research content into the curriculum.	<ul style="list-style-type: none"> Research-briefed Through our lectures, seminars, workshops and assessments our teaching introduces students to core curriculum and key innovations in our field, situating contemporary developments within appropriate conceptual and theoretical frameworks. Our students will be exposed to an inspiring and attractive curriculum in Politics drawing on the expertise and internationally recognised research produced in the School of History, Politics and International Relations and beyond. All teaching staff

<p>Research-based Framed enquiry for exploring existing knowledge.</p> <p>Research-oriented Students critique published research content and process.</p> <p>Research-apprenticed Experiencing the research process and methods; building new knowledge.</p>	<p>are engaged in research and bring their subject expertise and enthusiasm for inclusive, rigorous research into their teaching practice.</p> <ul style="list-style-type: none"> • Research-based Students are encouraged and supported to draw from a comprehensive range of published research and demonstrate a robust critical engagement with it. Typical assessments include essays, article analysis, annotated bibliographies, policy and conceptual analysis. Our student-led tutorials and seminars involve students working in small groups on tasks that require them to understand, critique, and apply concepts. • Research-oriented Our students are taught the key skills necessary to analyse and critically engage with published research, including how it is conceived, produced, used and communicated. • Research-apprenticed Our students are an important part of our research environment and are encouraged to take an active part in our learning community. From year 1, students are encouraged to ask big questions about the world. Through training and practice they learn the academic skills necessary to transform those questions into independent research projects. In their final year students produce a dissertation, an independently conceived, planned, and presented piece of research.
---	---

As part of studying at a research-intensive university, students on this programme have the following extra or co-curricular opportunities available to them to gain exposure to research culture:

Our students have numerous opportunities to gain exposure to research culture through extra-curricular events. These include the popular roundtable seminar series, in which roundtable discussions featuring a varying mix of staff and student researchers come together to discuss contemporary issues. Roundtables in recent years have covered topics such as the rise of the far-right and misogyny, and the 2024 U.S. election, and offer research-led opening remarks from staff with relevant expertise, followed by audience questions. In addition, a popular film club offers introductory remarks and a Q&A led by a staff member whose research connects to the film being screened. These events allow students to engage with cutting edge research, and to experience and participate in lively academic discussion.

Teaching on this programme will be research-informed (it draws consciously on systematic inquiry into the teaching and learning process itself) in the following way:

The School supports all staff involved in teaching to gain an accredited Higher Education teaching

qualification, in which they demonstrate their use of teaching theory to support their own practice and reflect on their current teaching and continuing professional development.

Through routine peer observation of teaching and feedback, teachers in the School are encouraged to reflect on their own practice, and to share, support, and develop as a learning and teaching community. The School holds an annual Teaching Away Day as well as termly teaching meetings for the Politics and International Relations team to develop ideas around best practice. These events allow for in-depth discussion of teaching, including the interface with research and how we support students to become research-briefed, research-based, research-oriented and research-apprenticed.

12b. Work-related learning

The workload of all students on this programme includes the opportunity to engage with *at least* 100 hours of employer informed, work-related learning activity. Further information regarding work-related learning is available [online](#).

13. Indications of programme quality

14. External Examiner(s) reports

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports for this programme can be found at exampapers@Leicester [log-in required]

THIRD YEAR (YEAR ABROAD)

The third year will be spent abroad either taking approved courses amounting to 120 Leicester credits in an institution associated with the Department of Politics and International Relations under the University's Study Abroad programme. Students will be required to complete the approved courses satisfactorily. Passing examinations in those courses shall be regarded as evidence of the students having completed them satisfactorily. Students who, in the opinion of the Board of Examiners, have not satisfactorily followed the approved courses at the overseas institution will not normally be allowed to proceed to the final year of the course, but may be permitted to transfer to the final year of BA Politics and International Relations without year abroad.

The year abroad will not contribute towards the overall classification, and will therefore be assessed on a pass or fail basis.
